The Revenues classed under Ancient Possessions were larger in 1809-10 and 1810-11 than in several subsequent Years, which gives a favourable View of the Rate of Charges of Collection.

^a The acquisition of Mahratta Territory settled 1820-21 added considerably to the Charges of Collection.

^b In 1820-21 and subsequent Years the Subsidy from the Peishwa is comprised in the Revenue from the Ancient Possessions, which causes a large apparent Increase in the Amount collected, whilst the Charges are stated as formerly, and thus shews an apparent Reduction in the Rate of Collection.

^c There was a great Falling-off in the Revenue in 1824-25, whilst the Charges remained as before, and thus occasions an Increase in the Rate of Collection.

The Custom Receipts derived from the Guicowar Possessions were exceedingly small prior to 1817-18, which, being proportioned to the small Establishments kept up, presents an unfavourable View in the Per-centage on the Collection.

The apparent Decrease in the Rate of Collection in 1817-18 and following Years is occasioned by new Subsidies from the Guicowar, whilst the Alterations in the Charges were not material.

The Customs in the Year 1824-25 were unusually low, which gives an unfavourable View of the Rate of Charges in the Collection.

^d This apparent Increase is partly occasioned by the Mode adopted in the Classification of the Revenues and Charges of this Year as compared with former Years, and partly by the Payment of Arrears of former Years.

^e Increase occasioned by the Charges consequent upon the Appointment of the Revenue Custom Committee and Falling-off of Receipts.

^f Includes Arrears of 1802-3 and 1803-6.

carry, and the AMOUNT of such INTEREST, and the STATE of CASH remaining in their TREASURY, and other Effects Debts and Assets in the Political and Territorial Branch from the Debts and Assets in the Commercial Branch.

- * *Mem.*—This Balance is subject to Reduction, by the Amount of the Advances made in India from the Territorial Branch to the Commercial Branch in the Indian Official Years 1828-29 and 1829-30. The Documents whereby the Amount of these Advances is to be ascertained have not as yet been received from India, but which, it is estimated, may amount to £6,561,220; which will leave a Balance due to the Commerce of £4,040,904, including Interest.

The respective Balances of the Political and Commercial Branches, as exhibited in this Account, will be likewise subject to Adjustment, from the same cause.

In the Period from 1st May 1814 to 1st May 1830 there has also been advanced, or set apart from the Surplus Commercial Profits in England, the Sum of £4,998,798 towards the Liquidation of Indian Territorial Debt, which, being a Payment under the Fourth Head of Appropriation of the 57th Section of 53 Geo. 3, is not held to constitute a Claim upon the Territorial Department for Repayment, upon the principle observed in respect to other Territorial Advances.

The Home Bond Debt is stated without specific Application to either Branch of the Company's Affairs, it not being determined to what Extent the Debt had its Origin from Political Causes.

No. 7.—COPY of a MINUTE of the GOVERNOR-GENERAL of INDIA, dated 30th October 1829, concerning the Indian Financial Estimates for 1829-30.

THE GOVERNOR GENERAL.

EXCLUSIVE of Europe stores, which being brought into our accounts as a receipt from England, and a territorial disbursement here, form part of the charges stated in the Accountant-General's estimate, the advances made in England during the past six years appear to have averaged about £1,500,000; and although under the present Act the territory has the benefit of a more advantageous exchange in its accounts with commerce, we must, I apprehend, in looking to futurity, take the pound sterling as equivalent, at the lowest, to ten rupees; unless, therefore, what is not likely, the home charges shall be reduced, we shall require a local surplus of at least one and a half crore to keep things square. It would be no more than prudent to seek an addition of fifty lacs, to meet contingencies, and to provide for the liquidation of debt, so that we can scarcely be said to have placed the finances of the country on a solid footing until we shall have secured a local surplus of two crore of rupees.

22,40,000

Now the Sketch Estimate for the current year holds out the prospect of a surplus to the amount only of 84,00,000 rupees; and of the receipts for which credit is taken 22,40,000 rupees form no part of our permanent income. On the basis of that estimate, therefore, we can only reckon upon a surplus of 61,60,000, leaving the sum of 1,38,40,000 rupees to be provided for by a reduction of charge or increase of revenue, in order to reach the position on which I have above assumed it to be necessary to place the finances.

See Statement
unexed.

If, following the principle adopted by the Honourable Court in their Letter of the 12th December 1827, we compare the estimated charges of the current year, exclusive of Europe stores, and of advances for salt and opium, with those of 1823-24, we shall find in the estimate an excess of 1,47,79,000 rupees still remaining to be retrenched, in order to place the finances in the position indicated by the Honourable Court.

This result appears to show that I have not exaggerated the exigency which Government has to meet, by requiring a net surplus of 50 lacs, and by adding to the home charges the excess which (estimating these charges in rupees) the alteration I have thought it prudent to anticipate in the rate of exchange would occasion, and that on the whole we should not rest satisfied with a surplus of less than two crores.

A superficial examination of the several items of which the receipts and charges are composed would enable me to exhibit grounds for anticipating a considerable amelioration in future years, supposing the tranquillity of the country not to be disturbed; but we shall still apparently be left at a great distance from the point indicated by the Home instructions, unless some decided and early steps be taken to expedite retrenchment. It will not suffice to ask, whether it will be desirable to maintain this or that thing. It seems to be now necessary for the Government distinctly to ascertain what amount of income it can securely reckon upon, and then to decide how the deficiency is best to be supplied; starting with the determination that it must at all events be supplied without the further accumulation of debt, already ruinously heavy.

With the above impression, I would suggest that the Civil Finance Committee be authorized to extend the sphere of their inquiries to every item and cause of charge without exception, and that the estimate for the current year be sent to them, that they may, in communication with the Accountant-general, endeavour to lay before Government a clear view of its future financial prospects, to shew the precise annual deficit

SELECT COMMITTEE OF THE HOUSE OF LORDS. 993

ficit to be provided for, and to submit such arrangements as may appear to them best calculated to secure a surplus of income to the amount required by the instructions of the Court of Directors. It will be proper that the Committee should on this occasion be instructed to regard themselves, and to act rather as the confidential advisers of Government, than as a distinct Board. I would further beg leave to suggest, that a copy of this Minute, and of the Statement annexed to it, be sent to the Governments of Madras and Bombay, that they may be distinctly apprised of the extent of the difficulties which have to be overcome, and that they may clearly perceive the necessity of the constant and strenuous co-operation of all the local Governments in the prosecution of economical reform, if we would fulfil the injunctions of the Home Authorities, or avoid the most ruinous embarrassment.

No. 8.—COPIES of LETTERS from the Court of Directors of the East-India Company to the Governor General and Governors in Council at Fort William in Bengal, Fort St. George in Madras, and Bombay, dated 10th March 1830.

(1.)—Letter from the Court of Directors of the East-India Company to the Governor General in Council at Fort William in Bengal, dated 10th March 1830.

(Territorial Finance Department.)

To the
Governor General
in Council
at BENGAL,
10th March 1830.

OUR GOVERNOR GENERAL IN COUNCIL at FORT WILLIAM in BENGAL.

PARA. 1. You will have observed in several of our recent despatches in this department, particularly those dated the 12th of December 1827 and 24th of September 1828, how anxiously we have observed the progressive increase in the civil charges of India, and how earnestly and repeatedly we have inculcated upon you the necessity of reducing their amount as far as may appear consistent with the exigencies of the public service.

2. We have lately caused to be prepared returns of the extent and expense of all the civil offices under our several governments, and of the establishments connected with them, in the years 1816-17 and 1826-27, stating, in regard to offices created or of which the salaries have been augmented since the 1st of May 1817, the date of such creation and of such augmentation, with the reasons assigned for each respectively.

3. We forward a number in the packet copy of such of these returns as relate to your presidency, and we direct that you will reconsider every item of increased charge, and every augmentation in the number of persons employed, both European and Native, with the view of reducing, as far as practicable, offices, establishments, and salaries, to the state in which they were in 1816-17, making of course, sufficient allowance for the new offices and establishments which became necessary in consequence of annexations of territory since that period. We are, indeed, desirous that it should be distinctly marked how much of the augmentations apparent on these returns have arisen from the acquisition of new territory.

4. We desire that you cause comparative statements to be made upon the principle of these now sent, but substituting the year 1829-30 for the year 1826-27, and that those statements be despatched to us in time to ensure our receipt of them by the close of January 1831 at the latest; and you will at the same time furnish us with a full report of the measures which you may adopt in obedience to the instructions now communicated to you.

5. In our examination of this subject, our attention has been particularly directed to the large augmentations apparent in the revenue and customs departments, upon which some remarks were made in paragraph 82 and 91 of our despatch in this department, dated the 24th September 1828; and in order that the aggregate of such augmentations might be clearly ascertained, we have caused statements to be prepared of the amount in each year during the present system of account, with a computation of the rate per cent. on the amount of revenue collected, particularizing the Lower Provinces, Benares, the Ceded and the Conquered Territory.

6. These

6. These statements, of which copies accompany this despatch, shew that the increase of the charges alluded to has been general and of very large amount.

7. We select, as a striking example, the statements applicable to the Lower Provinces, which shew that the rate of charge of collecting the land revenue has increased since 1816-17 from about 4½ per cent. to nearly 8 per cent. and that that of collecting the customs and town duties has increased since 1816-17 from about 10½ to 19 per cent.

8. We have also caused to be prepared a statement of your judicial charges, which in the Lower Provinces alone appear to have increased since 1814-15 from 58,93,871 current rupees to 65,07,206 current rupees.

9. We are fully aware that various new appointments, and other arrangements involving expenses in the revenue department, have been proposed by your government, and in many instances sanctioned by us; but that circumstance does not adequately account for the vast increase of charge which we are now pointing out; nor, if it did, could the fact of the arrangements having been all adopted with our concurrence, be deemed to preclude the necessity for inquiry whether it may not be practicable to reduce the rates of charge to their amount in 1816-17.

10. In regard to our old territory especially, it seems difficult to assign any reason why it should not be fiscally and judicially administered at the same cost now as it was then.

11. All arrangements made subsequent to that period, and which may have been considered beneficial and desirable to be adopted when our finances were in a state to bear the increased charge, must now be suspended or abolished, unless the urgent and unquestionable exigencies of the public service require them, in order that the revenues of India may be relieved from the expense which they are at present unable to defray.

12. These observations are also applicable in a degree to the charge of the Bengal Opium Monopoly, and to that of Salt, if an average of the last three years is contrasted with that of the first three years of the present system of account.

13. Statements of the charges in these departments accompany this despatch.

14. We also transmit a statement of the expense of the public offices at Calcutta in each year since 1814-15, shewing an increased charge of three lacs of rupees in 1827-28 as compared with 1814-15.

15. These statements furnish, we think, a convincing proof of the correctness of the remarks contained in paragraphs 161 and 162 of our despatch in this department, dated the 24th September 1828, as to increases of civil charges during war; and our object in now furnishing you with such documents, is to indicate some of the principal heads to which your attention should be directed, in those efforts to restore our finances which you are laudably making, and to the steady prosecution of which we cannot too earnestly excite you, their early and complete success being of vital importance to the character of our administration, and the welfare of the interests committed to our charge.

Had the Company's Profit and Loss Accounts been made up at the Mercantile Rate of Exchange, as ascertained from the Rates at which Bills have been drawn from London on Calcutta in each Year, instead of the Rates fixed by the Board of Commissioners for the Affairs of India, as regards the Repayment of Territorial Advances, the above Account of their Trade between Europe and India would have exhibited a Profit of £456,114, instead of a Loss of £2,009,872, making a Difference of £2,465,986

The Profit on their China Trade would also have been increased in the same Period by the Sum of 1,545,943

Making a Total Difference of £4,011,929

* The Freight of the above Consignments, which were for the greater part conveyed from India to China by Ships proceeding circuitously from England, has been apportioned according to the Company's usage. The extra Charge, however, paid to the Owners in the instances comprised in the above Statement for the Performance of the circuitous Voyage, together with Payments to Ships taken up in India for this service, amounted to only £374,471. If the Profit or Loss on this Trade were deducted from this Charge for Freight, instead of the Charge above inserted, the Loss thereon would be reduced to the Sum of £173,999, and the Profit on the Homeward Trade would be reduced in the same proportion.

- (1.) Copy of a Letter from the Right Honourable Lord Ellenborough to the Chairman and Deputy Chairman of the East-India Company, dated 13th June 1829.

Gentlemen,

It appears to me to be a subject of some interest to the East-India Company to ascertain, as far as it may be practicable, what relation the tea imported into the continent of Europe and into the United States of America actually bears in quality and in price to that imported by the East-India Company into the United Kingdom.

I propose to request the Earl of Aberdeen to desire his Majesty's Consuls to transmit to this country, without delay, samples of the several sorts of tea, together with a statement of the price of each sort, for the purpose of making the comparison I have suggested above.

The expense cannot be considerable, and I should think you would have no objection to bear it.

I am, &c.

(Signed) ELLENBOROUGH.

- (2.) Copy of a Letter from the Chairman of the East-India Company to the Right Honourable Lord Ellenborough, dated 17th July 1829.

My Lord,

The Court of Directors of the East-India Company have had under their consideration your Lordship's letter of the 13th ultimo, in which you propose to request the Earl of Aberdeen to desire his Majesty's Consuls to transmit to this country samples of the tea imported into the continent of Europe and into the United States of America, in view to ascertain, as far as it may be practicable, what relation such tea bears in quality and in price to that imported by the Company into the United Kingdom; and I have been requested by the Court to beg that your Lordship will have the goodness to proceed in procuring the samples of tea in the manner proposed in your letter, the expense of which the Court will be ready to defray.

I have the honour, &c.

(Signed) JOHN LOCH.

- (3.) Copy of a Letter from B. S. Jones, Esquire, to John Backhouse, Esquire, dated at the India Board, 6th July 1829.

Sir,

I am directed by the Commissioners for the Affairs of India, to request that you will move the Earl of Aberdeen to instruct his Majesty's Consuls at new York, Boston, St. Petersburg, Hamburgh, the Hague, and Frankfort, to transmit to this Board fair samples of the several sorts of tea sold at the above-named places; the samples to embrace the highest, middle, and lowest qualities of tea in most general use; each sample to be of not less than 20lbs., and the price to be annexed to each; together with a statement of the duty paid thereon per lb.

The Commissioners for the Affairs of India will take measures for defraying the charges which may be incurred by the several Consuls, on receiving proper statements thereof.

I am further directed to request that the several Consuls may be instructed to indorse the packages containing the samples of tea in these words: "Samples of tea, on ac-

count

count of the East-India Company, by order of the Commissioners for the Affairs of India."

I have already been directed to apply to the Lords Commissioners of his Majesty's Treasury for permission to import packages so addressed.

I am, &c.

(Signed)

B. S. JONES,
Assistant Secretary.

(4.) Copy of a Letter from John Backhouse, Esquire, to B. S. Jones, Esquire, dated at the Foreign Office, 3d September 1829.

Sir,

With reference to your Letter of the 6th July last, requesting that certain of his Majesty's Consuls abroad might be instructed to send to this country samples of tea sold at their respective residencies, I am directed by the Earl of Aberdeen to transmit to you, for the information of the Commissioners for the Affairs of India, the copy of the instruction which his Lordship caused to be addressed to his Majesty's Consuls, in conformity with the Commissioners' request.

I am, &c.

(Signed)

J. BACKHOUSE.

Enclosure in No. 4.

Copy of a Circular Letter from John Bidwell, Esquire, to His Majesty's Consuls at St. Petersburg, Hamburgh, Rotterdam, Frankfort, New York, and Boston, dated at the Foreign Office, 12th August 1829.

Sir,

I am directed by the Earl of Aberdeen to desire that you will procure and transmit to the Board of Commissioners for the Affairs of India fair samples of the several sorts of Tea sold at (—————).

The samples are to embrace the highest, middle, and lowest classes of tea in most general use, and each sample is to be of not less than *twenty pounds weight*. The price is to be annexed to each sample, together with a statement of the duty paid thereon per pound.

You will cause these samples of tea to be carefully packed, and forwarded to London, and you will cause the packages to be addressed as follows:—"Samples of Tea, on account of the East-India Company, forwarded by his Majesty's { Consul General }
at (————) to the Commissioners for the Affairs of India in London." Consul

You will forward to this department a statement (*in duplicate*) of the expense which you may incur in executing this commission; and you will mention the name of the individual in London to whom the amount can be paid on your account, by the Board of Control, in reimbursement thereof.

You will at the same time state by what conveyance you have forwarded the required samples of tea, and the probable time of their arrival in this country.

I enclose the copy of a letter from the India Board on this subject.

I am, &c. &c.

(Signed)

JOHN BIDWELL.

- (5.) Copy of a Letter from Henry Canning, Esquire, His Majesty's Consul General at Hamburg, to John Bidwell, Esquire, dated 13th October 1829.

Sir,

With reference to your letter of the 12th August last, I have to inform you that I have selected, not without some difficulty, samples of the several sorts of tea sold in Hamburg, conformably to the instructions contained in your letter. There are in all 26 chests, weighing from 30lbs. to 75lbs. net each, in the original packages in which they have been imported here; and I expect that they will be forwarded to London in the steam vessel which will sail from hence next Saturday the 17th instant, and may arrive on the 19th or 20th instant. The chests will be addressed as desired; and I shall send an account of the cost as soon as it can be prepared. The amount will probably be between £150 and £180 sterling.

I am, &c.
(Signed) HENRY CANNING,
Consul General.

- (6.) Copy of a Letter from Henry Canning, Esquire, His Majesty's Consul General at Hamburg, to John Bidwell, Esquire, dated 20th October 1829.

Sir,

I beg leave to send herewith the invoice of the twenty-six chests of sample tea, shipped on board the steam vessel "William Jolliffe," for London, the bill of lading for which I transmitted to you on the 16th instant.

The invoice amounts to £141. 0s. 3d. sterling, which sum I request may be paid into the hands of Messrs. Barnetts, Hoare, and Co. Bankers, for my account, to enable me to pay for the tea.

The quantity, I fear, may be more than it was intended I should send, but I could not get smaller chests in original packages, and I deemed it of consequence, in order to form a fair judgment of the qualities of tea brought to this market, that they should be seen in the state in which they are imported. These chests were all opened for the first time in my presence, and have not been touched, except to take a small sample, and which I have retained.

The prices which I have been obliged to pay are higher than those given in my despatch in January last, and I beg leave to refer to the enclosed copies of the correspondence which has taken place, then and now, between me and some of the importers and tea-dealers here, on the subject, which will explain the cause of the difference.

I have added a statement which will shew at one view the cost of the sample of each sort of tea in Hamburg and sterling money, the duty per pound actually paid on each, and the prices at which each sort may be bought in large parcels from the importers.

The whole, I hope, will be found to be conformable to the instruction to me contained in your despatch of the 12th of August last.

I am, &c.
(Signed) HENRY CANNING,
Consul General.

SELECT COMMITTEE OF THE HOUSE OF LORDS. 1093

Second Enclosure in No. 6.

Copy of a letter from one of the principal Importers of Tea into Hamburgh, to his Majesty's Consul General, stating the then Market Prices of Tea, dated Hamburgh, 22d December 1828.

My dear Sir,

Replying to your friendly lines of this day, I beg leave to inform you, that Mr. Sieveking will answer the substance of your inquiries about the tea trade of this place. He communicated to me your note on the subject; and as our Custom-House registers can furnish no details such as you wish to have, I have communicated to Mr. Sieveking, from my own superficial knowledge of the trade, such general remarks as I am able to give. I beg leave then to refer to what Mr. Sieveking will communicate to you. On the point of the present prices of tea, I feel great pleasure in giving you the following elucidation. They rule now :

Bohea	-	-	6	to	8½	Schillings B° per lb.	-	5	Pence	to	7½	Sterling.
Congou	-	-	10	to	12	-	-	8½	-	to	10½	—
Campoi	-	-	10	to	15	-	-	8½	-	to	12½	—
Souchong	-	-	7	to	18	-	-	5½	-	to	15½	—
Hyson Skin	-	-	7½	to	15	-	-	6½	-	to	12½	—
Twankay	-	-	9	to	18	-	-	7½	-	to	15½	—
Young Hyson	-	-	11	to	20	-	-	9½	-	to	16½	—
Hyson	-	-	26	to	38	-	-	22½	-	to	32½	—
Imperial or Gun- powder	-	-	34	to	40	-	-	28½	-	to	33½	—
Pecco	-	-	40	to	64	-	-	34½	-	to	55½	—

The sterling shews the net price for the English net pound, all charges deducted except freight and insurance. Exchange taken at 13 marks 10 sch. per pound sterling.

These are the prices at which, according to the quality, sales are effected here in bulk; the highest must be understood for *prime* quality, which, however, only comes forward, if at all, in but small lots. Retail prices I am not enabled to give; nor can they, I think, be of any interest, except between the dealers and retailers and their customers.

Third Enclosure in No. 6.

Translation of a Letter from one of the principal Tea Dealers in Hamburgh to His Majesty's Consul General, stating the then Market Prices of Tea, dated the 16th January 1829.

Sir,

We have the honour to give you the following information about the tea trade here, as accurately as our business will enable us to do.

The importation of tea of late years may be taken on the average at 10 to 12,000 quarter chests yearly. How much thereof may have been re-exported, and how much consumed here, cannot be stated. The prices paid for parcels of tea are as follow :

Bohea	-	-	-	-	6	to	7	Schillings Banco per lb.
Caper Souchong	-	-	-	-	7			—
Congou	-	-	-	-	10	to	13	—
Campoi	-	-	-	-	10	to	12	—
Souchong	-	-	-	-	7	to	14	—

Pecco

Pecco	-	-	-	36	to	56	Schillings Banco per lb.
Singlo-Twankay	-	-	-	9	to	14	—
Hyson Skin	-	-	-	7	to	10	—
Hyson	-	-	-	26	to	36	—
Young Hyson	-	-	-	10	to	16	—
Imperial Gunpowder	-	-	-	32	to	36	—

Small quantities of particularly fine quality, which however seldom come, are worth more.

Fourth Enclosure in No. 6.

Translation of a Letter from a principal Tea Dealer at Hamburgh to His Majesty's Consul General, dated 28th September 1829.

For direct Importations of Tea, the following may at present be about the Prices :

Bohea	-	-	-	7	to	10	Schillings Banco per lb.
Congou	-	-	-	11	to	15	—
Campoi	-	-	-	11	to	18	—
Souchong	-	-	-	18	to	20	—
Hyson Skin	-	-	-	7½	to	20	—
Twankay	-	-	-	10	to	18	—
Young Hyson	-	-	-	10	to	20	—
Hyson	-	-	-	26	to	38	—
Imperial Gunpowder	-	-	-	32	to	40	—
Pecco	-	-	-	36	to	64	—

It is to be observed, that our market changes every four to eight weeks. In general, at the sale of a new direct cargo of tea, another rate of prices takes place, according as the stock of particular sorts may be exhausted. Thus, it is not to be pretended that the prices made on the change can continue long on any fixed footing, owing to the difference in each single sort.

In reference to the prices in January last, we can now provide you with each sort of tea, in original packages, at the following rates :

January Prices.

Bohea	-	6	to	8½	can now sell at	9	to	10	Schillings in single chests.
Congou	-	10	to	12	-	14	to	16	—
Campoi	-	10	to	15	-	13½	to	17	—
Souchong	-	7	to	18	-	9.	14.	24.	—
Pecco	-	36.	56.	64.	-	36.	60.	80.	—
Hyson Skin	-	7½	to	15	-	9.	14.	18.	—
Twankay	-	9	to	18	-	17½	to	20	—
Young Hyson	-	11	to	20	-	16	to	26	—
Hyson	-	26	to	38	-	30.	34.	42.	—
Imperial	-	34	to	40	-	38	to	42	—
Gunpowder	-	34	to	40	-	40	to	46	—

Fifth Enclosure in No. 6.

Copy of a Letter from one of the principal Importers of Tea at Hamburgh to His Majesty's Consul General, dated 30th September 1829.

Dear Sir,

Replying to your note of 29th September, I would observe, respecting the prices of tea, that they rule a shade higher now than in January ; namely,

Bohea

SELECT COMMITTEE OF THE HOUSE OF LORDS. 1095

Bohea - - -	7 to 10	Schillings Banco, equal to 54½ to 8½ Pence sterling.	
Congou - - -	11 to 13	9½ to 11½	—
Campoi - - -	11 to 16	9½ to 13½	—
Souchong - - -	9 to 24	7½ to 20½	—
Hyson Skin - - -	7 to 16	5½ to 13½	—
Twankay - - -	9 to 20	7½ to 17½	—
Young Hyson - - -	11 to 24	9½ to 20½	—
Hyson - - -	27 to 38	22½ to 32½	—
Imperial or Gun- powder - - }	34 to 40	28½ to 33½	—
Pecco - - -	40 to 64	34½ to 55½	—

The stock in importers' hands amounts, at this time, to 9,950 boxes. The same as in all other branches of trade; transactions in tea have also been extremely limited this year, and the higher prices which I quote must be considered as the effect of better qualities having appeared this year. The import this year amounts to about 15,000 boxes.

Sixth Enclosures in No. 6.

Copy of a Letter from His Majesty's Consul General to a principal Importer of Tea in Hamburg, dated 5th October 1829.

My dear Sir,

In reference to your obliging note of the 30th ultimo, containing the prices of tea, allow me to ask if you could accommodate me by selling me some single boxes, in original Packages, at those prices; for instance

½ Chest of Bohea	-	-	at 7s. Banco per lb.	
½ Do. Congou	-	-	at 11s.	—
½ Do. Campoi -	-	-	at 11s.	—
½ Do. Hyson Skin	-	-	at 7s.	—
½ Do. Twankay -	-	-	at 9s.	—
½ Do. of Young Hyson	-	-	at 11s.	—
½ Do. of — Do.	-	-	at 24s.	—
½ Do. Hyson -	-	-	at 27s.	—
½ Do. Imperial	-	-	at 34s.	—

or in any other original packages.

Seventh Enclosure in No. 6.

Copy of a Letter from a principal Importer of Tea in Hamburg to His Majesty's Consul General, dated 6th October 1829.

My dear Sir,

I infinitely regret that it is not in my power to accommodate you with single boxes of the teas you require. We are importers only, selling in bulk what is sent to us, and as such never keep an assorted stock. We have not indeed a box of bohea, nor of the common qualities which you wish to have; and indeed if we had I could not break the package, our tea dealers being very particular in not taking a broken package, there being a tacit understanding between us that we should never retail. If you want single boxes of the description you name, by way of sample, you can get them only through the medium of brokers, as you will not find them complete in the hands of any one of our dealers, as even they are not completely assorted. This mode of procuring samples will have, however, this inconvenience—that you will fall under the retail price, paying nine or ten shillings for what in wholesale is not worth above seven, and so on.

Eighth Enclosure in No. 6.

A Statement of Samples of Tea shipped on Account of the Honourable East-India Company by His Majesty's Consul General at Hamburg, and forwarded to the Commissioners for the Affairs of India, in London; shewing, in Hamburg and sterling money, the prices at which they have been bought, and the duty that has been paid on each per pound; and also the market prices paid here for teas of the same sort and qualities when bought in large parcels from the importers.

(7.) Copy of a Letter from Alexander Ferrier, Esquire, His Majesty's Consul at Rotterdam, to the Commissioners for the Affairs of India, dated 12th September 1829.

Sirs,

In compliance with instructions received from the Earl of Aberdeen, I have purchased, for account of the East-India Company, to be forwarded to your Board, thirty-five samples of the different kinds of tea most generally in use in this country, which I expect to be able to forward per the English steam-boat "The Queen of the Netherlands," which leaves this place next Wednesday the 16th instant.

The tin boxes containing the samples will be securely packed in six larger cases, each

each addressed in the manner directed; and the cost of the whole, including charges, will amount from £160 to £180, the particulars of which I shall have the honour to transmit to your Board, along with the bill of lading, when the samples are shipped; and I shall then also take the liberty to point out the mode for my reimbursement. Having now stated the probable value, for the purpose of effecting insurance, should such be deemed necessary,

I have, &c.

(8.) Copy of a Letter from Alexander Ferrier, Esquire, His Majesty's Consul at Rotterdam, to the Commissioners for the Affairs of India, dated 15th September 1829.

Sirs,

With reference to the letter I had the honour to address you on the 12th instant, I have now to transmit herein Mr. Richard Sharp's bill of lading for tea shipped on board his vessel "The Queen of the Netherlands" steam-boat, bound to London, to your order.

Six chests, addressed agreeably to your directions, containing 35 samples of tea, of which I also here inclose the invoice, amounting to f. 1,929. 02., and making, at the exchange of f. 12. 12½, being that of to-day, £159. 1s. 10d. sterling, which I beg the favour of you to cause to be paid at your convenience into the hands of my friends Messrs. Coutts and Co. of your city.

In marking the sample boxes I have made a small deviation from your instructions, having omitted the price on the label, and inserted the name and the *running* and *assorted* numbers of each sample, the *first* on the *left* and the *second* on the *right corner*, following the description of the sample, which, by comparing with the corresponding numbers in the invoice, I trust will be found sufficiently perspicuous.

Of the bohea and pecco teas there are only two samples of each, because the range of quality did not admit of more. On the other hand, the diversity of assortments found in the souchong rendered it advisable to send four samples of this kind. The other sorts comprise three samples.

All the boxes contain at least about the quantity ordered; some unavoidably contain more, from the close packing, it having been considered best to preserve a uniformity in the size of the sample boxes, for the sake of greater security in the outward package.

In further elucidation of the present state of the tea trade in this country, I take the liberty to enclose, for your information, a short account of it; to which I have added a table, referring to the thirty-five samples forwarded, recapitulating the retail prices at which they have been purchased—the corresponding wholesale prices *now* quoted, which will be generally found higher than those quoted last November—the ships' names by which imported—the names of the hong merchants by whom shipped—the flag under which imported—and the numbers of the lots by which the parcels are distinguished in the tea establishment.

The table likewise states, by way of remarks, the three respective duties, Nos. 1, 2, 3, under which teas are admissible into this country, both per 100lbs. and also per ½lb. Netherlands, the manner of levying which is explained in the further statement which also accompanies the present.

I shall be happy to afford any further information which your Board may think fit to call for. Having the honour to subscribe myself, with great respect, &c.

(Signed) ALEX. FERRIER.

Second Enclosure in No. 8.

A short Account of the State of the Tea Trade in the Netherlands in 1829.

The consumption of bohea tea is very much diminished by the low price of congo, kampoi, and souchou. The importation of the first-mentioned have also of late decreased considerably, and whatever is imported ought to be in *quarter* or in *congo* chests, which is the description in most general demand. Assuming the quantity of 6,000 $\frac{1}{4}$ -chests of tea as the basis for an assorted cargo, 400 $\frac{1}{4}$ -chests of bohea would be a proper proportion.

Of souchou, congo, and campoi, the *first* is most in use; after which follows the *congo*; and, lastly, the kampoi. The consumption of the last-mentioned is not extensive, unless it has a pecco flavour, in which case it will command high prices. Of these three sorts, the high-flavoured, and those particularly which hold water best, are most generally esteemed and sought after.

Pecco is sparingly demanded for home consumption; the best qualities, which must be particularly *grey* or *whitish* at the points, are much inquired after for Brody, on the frontiers of Poland and Russia, and command high prices; and considerable orders also come occasionally from Frankfort on the Maine for the same descriptions. A parcel of 400 $\frac{1}{4}$ -chests of the foregoing description (*grey*), in a general cargo, would be sure to answer well; a *larger* proportion of this kind might subject it to a considerable reduction in value.

Of tonkay, hyson skin, and songlo, the first is in greatest demand for the consumption of this country, and the two other sorts in proportion to the rotation in which they here stand:

For a cargo, as already described, the proportions of

700 $\frac{1}{4}$ chests	- -	Tonkay,
400 $\frac{1}{4}$ —	- -	Hyson Skin,
200 $\frac{1}{4}$ —	- -	Songlo,

would be considered a good assortment. Of these three sorts, those bearing the hyson, or (as it is termed) *curled leaf*, are most esteemed; the tonkay of that description is chiefly purchased for Braband, and sometimes also for the Nether Rhine.

Hyson experiences a pretty extensive consumption. The very fine qualities find ready purchasers, at high prices, for the Braband market, where there is a considerable consumption of it; and it is also occasionally ordered, at high prices, for Germany. Young Hyson (called Uxim in the Netherlands) meets in Holland a tolerable consumption, but is most generally used in Friesland, and there the fine qualities command high prices.

Imperial (of large round grain) is not generally used; but the fine descriptions are sometimes purchased at extravagantly high prices for the Braband market; 150 $\frac{1}{4}$ chests would be a proper proportion of this sort.

The fine gunpowder (small grained) fetches high prices; it is chiefly purchased by English travellers, and likewise for the purpose of smuggling into England, which is also occasionally the case with good bohea tea in *quarter* chests.

The prices charged in the invoices of the accompanying samples are the current retail prices of the day; but the prices now quoted for the wholesale lots, or chops, at public sales, will be found in the annexed table.

As the Netherlands Trading Company, however, have advertised a sale of 16,583 chests against the 14th October, the present quotations may possibly undergo some alteration, more especially those of the finer qualities, as the sale will chiefly consist of old ordinary parcels purchased by the Company at their first outset, on the spot,
on

on speculation, together with some parcels of middling and good middling qualities imported by them in 1828 by the ship *Helena*. The fine qualities are wanting.

The Trading Company intend, for the first time, in the ensuing sale, as far as regards the *Helena's* cargo, to introduce new conditions; that is, to weigh *net*, without any allowance of *good weight*, and also to deduct only the *real tares*. Hitherto the customary allowances have been from 5 to 7 per cent. upon the *real tares*, and about three half-pounds Netherlands silent weight. And which conditions will probably continue to be granted by individual importers, both Dutch and foreign, as being an additional inducement for purchasing, with the dealers in that article.

Tea improves at present in public estimation; and there is a great probability of an advance, if the Americans discontinue their supplies, which they have already begun to do this year, on account of the high duty, and have carried all to Hamburg, from whence partial supplies have come hither of the fine qualities.

The two first expeditions undertaken by the Trading Company consisted of *four* ships *each* year; but the losses resulting from those operations rendered it advisable for the Company to confine their third and fourth expeditions to two cargoes annually.

It is generally expected that some alteration in the tea trade is at present in contemplation with the Netherlands government; and the opinion is, that the interest and will of His Netherlands Majesty incline towards a monopoly in favour of the Trading Company, which the dealers of the article are in favour of, while, on the other hand, it is no less generally deprecated by the general commission merchants.

The consumption of tea continues without any perceptible increase, which is chiefly ascribed to the present low state of the coffee market.

The tea establishment referred to in the following table is conducted by two warehousemen of respectability, and their integrity and responsibility are guaranteed to the public by commissioners who have the faculty of directing and inspecting the management of the establishment.

Their duties are: to receive and warehouse the teas outstanding; to sample and arrange the different chops into lots of twenty-quarter chests, in which quantity they are generally sold; for which they issue warrants, and remain answerable for the identity of the teas so long as they continue in their possession; those warrants in the meanwhile being transferable, and likewise admissible as *legal* pledges for loans of money.

For those respective duties the establishment charges three franks or 300 cents for every 100 kilogrammes or 100lbs. Netherlands; and the purchasers afterwards pay ten stivas or fifty cents per month, for warehouse rent of eight-quarter chests; and further, for weighing and delivery eight stivas or forty cents per quarter-chest.

All which duties are subject to an augmentation of 13 per cent. syndicate.

The duties are levied under the following deductions for tares: For ordinary kinds of chests, weighing 55 kilogrammes or more, 18 per cent.; for all those of ordinary description, weighing under 55 kilogrammes, 25 per cent. As bohea and common congos shall only be admitted unmixed, teas imported in whole chests, without such chests serving as covers to smaller or other packages; these will not be admitted as coarse or common congo, even if packed in whole chests, if such as according to the current price at the time of entry should be valued at 2f. per Kilogramme or Netherlands lb., or upwards; and therefore all teas entered as such may be assumed by the Custom, &c. officers at the value of 2 f., with the suppletory advance, according to the laws of the customs applicable to such emergencies.

(9.) Copy of a Letter from Christian Koch, Esquire, His Majesty's Consul at Frankfort, to John Bidwell, Esquire, dated 4th October 1829.

Sir,

I have the Honour to enclose the account of the purchase of tea made by order of the Right Honourable the Earl of Aberdeen, for the Board of Commissioners for the Affairs

Affairs of India, transmitted to me in your letter dated 12th August, which reached me on the 31st August.

During the present September fair, I had the best opportunity of procuring the several sorts of tea, consisting of the highest, middle, and lowest classes in most general use for consumption in this town, as well as for exportation into the interior of Germany and Switzerland. The purchase consists of ten different qualities, and 20lbs. weight each, as stated in the enclosed account, which states all the particulars.

I have expedited the same through the hands of Mr. Martin John Jenison at Hamburg, in a case marked as prescribed, who will ship it by the first sailing British vessel for London, under regular advice, and claim his disbursements from the captain, to be reimbursed, together with the freight, &c. on delivery. The case weighed here 3½ cwt., and the land carriage to Hamburg has been stipulated at six dollars 2 r. d., or at R.B.5. in gold per cwt. (about 6/8 per cwt.), to be delivered there on the 10th instant; and as vessels are constantly in lading, the samples will probably reach London before the end of this month.

They are packed in three original tea chests, each quality in a separate package (as per invoice), and the quality and price are marked on each. These three chests are marked A. B. C., and sealed with my official seal.

A. contains,

Green - - { No. 1. 20lbs. The Hyson Skin ordinaire, per lb. 45 kr. or 1/3.
No. 2. 20lbs. The Songlo fine, per lb. 1 fl. or 1/8.
No. 3. 20lbs. The Hyson fine, per lb. 1 fl. 45 kr. or 2/11.

B. Contains,

Green - - { No. 4. 20lbs. The Imperial ordinaire, per lb. 2 fl. or 3/4.
No. 5. 20lbs. Poudre à Canon, extra fine, per lb. 3 fl. or 5/.
Black - - { No. 6. 20lbs. Superior Bohea, per lb. 48 kr. or 1/1.
No. 7. 20lbs. Superior Kempoy, per lb. 1 fl. 45 kr. or 2/11.

C. contains,

Black - - { No. 8. 20lbs. The Souching fine, per lb. 1 fl. 30 kr. or 2/6.
No. 9. 20lbs. Superior Souchong, 2 fl. 15 kr. or 3/9.
No. 10. 20lbs. Pecco fine, 3 fl. or 5/.

The calculation in shillings has been made by adopting the exchange on London at 12 florins; curr. at 11 fl. per £ sterling.

The duty on tea of all sorts at Frankfort is hardly one farthing on the pound weight, and therefore not marked on each sample.

My disbursements on this expedition amount to 362 florins, viz.

(10.) Copy of a Letter from Sir Daniel Bayley, His Majesty's Consul General at St. Petersburg, to John Bidwell, Esquire, dated ^{25th Sept.} 7th Oct. 1829.

Sir,

I have the honour to acknowledge the receipt of your letter of the 12th August, conveying to me Lord Aberdeen's directions to procure, and transmit to the Commissioners for the Affairs of India, fair samples of the several sorts of tea sold here, embracing the highest, lowest, and middle qualities of tea in most general use.

In obedience to this I have procured, and put on board a vessel bound for London, called the "Sappho," John Gatenby, Master, a case containing samples of the tea, as specified in your letter. To the directions therein I have attended as closely as possible.

I now enclose an account of the tea, amounting to £75. 3s. 5d. at the exchange of the day, which I request you to cause to be paid to Mr. Benjamin Read, No. 5, Great Tower Street.

I also enclose a specification of the teas, the bill of lading, and a price-current.

The usual passage of ships from Cronstadt to London is a month at this season, and the Sappho may be expected in about that time.

I have, &c.

(11.) Copy of a Letter from J. C. Buchanan, Esquire, His Majesty's Acting Consul at New York, to John Bidwell, Esquire, dated 31st October 1829.

Sir,

I have the honour to acknowledge your letter of the 13th August last, desiring me, by directions from the Earl of Aberdeen, that I should procure and transmit to the Board of Commissioners for the Affairs of India fair samples of the several sorts of tea sold at New York, and instructions as to the manner and form in which his Lordship's directions should be attended to.

I have procured samples of the above article, and beg to enclose invoice and bill of lading thereof, and also a statement of the expense incurred, which I can be reimbursed through Messrs. Puget and Bainbridge, Bankers.

The quantity of several of the samples will be found considerably over 20lbs. weight, where packages could not be found of that weight; and it would not be a fair sample to break the packages. The wholesale and retail prices appear in separate columns, and the duty payable.

No drawback of duty could be allowed here, as there was not 50 dollars worth imported in any one ship, which is required to claim it.

The ship "Hannibal" is now ready to sail, and will probably arrive as soon as you receive this letter.

I am, &c.

The Custom-House allows 20lbs. Tare on all Chests containing Green Tea. The actual Weight is less One Pound, which is always added by the Importer to the Dealer. When covered with Matting, an Allowance of Two Pounds is made on each Chest. The Tare of Packages is found by emptying two or more, and averaging the weight. At most public Sales the price of Lots will vary from 3 to 9 Cents per lb.

Small Invoice of very fine Hyson and Young Hyson will often sell from 125 to 150 Cents per lb.; the Difference on other Descriptions will not be so great.

All Teas are sold for approved indorsed Notes at Six Months.

(12.) Copy of a Letter from George Manners, Esquire, His Majesty's Consul at Boston, to John Bidwell, Esquire, dated 25th November 1829.

Sir,

In compliance with the instructions of the Earl of Aberdeen, I have shipped on Board the American Ship "Dover," bound to Liverpool (where she will probably arrive between the 20th and 26th December), twelve packages containing samples of teas most generally used in this State, which I have addressed as desired, and, as no vessel will sail hence for London for some time, consigned to the Collector of His Majesty's Customs at Liverpool, to whom I have written, and enclosed a bill of lading.

I deemed it advisable to take sufficient quantities to enable me to receive the drawback of the whole duties, to entitle me to which it was necessary to take as much as was charged with fifty dollars duty *on each separate importation*: could I have obtained all the required samples out of one and the same cargo, a less quantity would have sufficed. I have the honour to observe, that unbroken packages will prove much more correct samples than could have been obtained from tea-dealers, who would have charged retail prices, which, with the duties that must have been paid, would have amounted to as much or more expense than has been incurred.

The teas were selected for me by Mr. Bryant P. Tilden, who has great experience in the Canton trade, and were purchased at the same prices that would have been charged by the 100 chests. I am much indebted to him, and also to Messrs. Perkins and Co. of this city, who are the most extensive East-India merchants of the United States, for the information that enabled me to make out the correct statement which I have the honour to transmit herewith, for the Commissioners for the Affairs of India in London, and of which I shall send copies in duplicate by the "Dover," for the perusal of the Earl of Aberdeen, conceiving that it may be useful to refer to, when the question relative to the renewal of the East-India Company's Charter shall be taken into consideration. It will be seen, that in addition to the present wholesale and retail prices, I have stated their prime cost at Canton.

The whole cost and charges of the teas were 508 dollars and 32 cents, from which is to be deducted 236 dollars 76 cents, being the amount of duties (as per invoice herewith sent), which will be paid on receipt of a certificate of landing from the American Consul, which I have requested the Collector of Customs to obtain, and forward to me. The balance of 271 dollars 56 cents I will thank the Commissioners for the Affairs of India to have paid into the hands of Messrs. Robert and William Pulsford, of Great St. Helen's, London, merchants, to the credit of Messrs. Isaac Winslow and Son, of Boston, Merchants.

I have, &c.

(Signed) GEORGE MANNERS.

(13.) Copy of a Letter from George Manners, Esquire, his Majesty's Acting Consul at Boston, to the Commissioners for the Affairs of India, dated 25th November 1829.

My Lords and Gentlemen,

In conformity with instructions received from his Majesty's Principal Secretary of State for Foreign Affairs, I have forwarded to you, by the American ship "Dover," *via* Liverpool, there being no ship about to sail hence for London, twelve packages, containing samples of teas most generally used in this state, and have the honour to transmit herewith a statement containing all the information required, together with the prime cost in Canton.

In my despatch relative to the subject, forwarded to the Foreign Office, I have explained all the circumstances respecting the purchase of the samples, I shall be obliged by your paying the amount of the costs and charges, *viz.* 271 dollars 56 cents, into the hands of Messrs. Robert and William Pulsford, of Great St. Helen's London, merchants, to the credit of Messrs. Isaac Winslow and Son, of Boston, merchants.

I have transmitted duplicate invoices, and the necessary vouchers, to the Foreign Office.

The packages have on them a printed address similar to the enclosed. I have consigned them to the Collector of His Majesty's Customs at Liverpool, whom I have requested to obtain from the American Consul the certificate of landing necessary to cancel the bonds given here, and to enable me to receive the drawback.

I have, &c.

I have the honour to observe that Imperial, the highest Class of Hysons, and Bohea Teas, are not generally used in Boston. The Duty on the first and on Gomer Hyson (of which none is imported *under that Name*) is 50 Cents per lb., and on the latter (Bohea) 12 Cents. The Duties on other Teas are as follows; viz. Hyson and Young Hyson, 40 Cents per lb.; Hyson Skin and Tonkay Hyson, 28 Cents; Souchong and all Black Teas, 25 Cents per lb. A Drawback of the whole (without any deduction) is allowed on Exportation, but no Drawback is allowed unless the Duties amount to 50 Dollars on Goods of the same Importation or Cargo. The Duties on all Goods from China are payable at eight, ten, and eighteen months, and are secured by the Bonds of the Importers and two or more Sureties. A Discount of 4 per Cent. only is allowed on prompt payment. The Samples sent were obtained at the prices charged by the Hundred Chests. Tea Dealers, who only take a few chests, are

Imperial, D.1.25/00; Hysons, from 90/00 to D.1.25/00; Young Hyson, from 90/00 to D 1.12½/00; Hyson Skin and Tonkay Hyson, from 57/00 to 75/00; Black Teas, such as Souchong, Congou, Campoy, &c., from 50/00 to 70/00; Bohea from 25/00 to 33½ per lb.

The preceding Statement may be implicitly relied on, as my information was obtained in a manner and from sources which precluded the possibility of deception. The cost in China was copied from the original Invoices. It will be seen, when Freight, Interest, and Insurance are taken into consideration, that Teas are at present imported into the United States without any profit to the Importers.

Sir,

The Commissioners for the affairs of India having considered it advisable to obtain from foreign Europe and America samples of the teas imported into those countries, are desirous that these samples should be examined by a few of the most respectable tea brokers, in the presence of some person deputed by the Committee of Privy Council for Trade.

I am therefore directed by the Board to request that their Lordships will appoint some officer of their establishment to attend in Cannon Row for this purpose; and that they will also, if it be in their power, furnish the Board with a list of such persons engaged in the tea trade as are likely to pronounce a just opinion on the respective qualities of the teas.

Sir,

With reference to your letter of the 18th ult., relative to the examination of some samples of tea lately received by the Commissioners for the affairs of India from foreign Europe and America, I am directed by the Lords of the Committee of Privy Council for Trade to transmit to you the enclosed copy of a letter which has been written to me by direction of the Commissioners of Excise, and in which is contained a list of the names of eight firms or houses of tea-brokers by whom the greatest quantities of tea have been purchased at the East-India Company's sales in the last year, and who therefore appear to their Lordships to be the fittest persons to consult on this occasion.

The Lords of this Committee direct me to suggest, that it may be advisable to request of each firm that they would communicate the name of the person whom they would recommend for the purposes of the proposed examination.

I am to request that the Lords of this Committee may be apprized of the time when the examination is to be made, and they will take care that Mr. Hume, one of their assistant secretaries shall attend the meeting.

Gentlemen,

The Commissioners for the affairs of India have received from certain of His Majesty's Consuls on the Continent of Europe, and in the United States of America, samples of the teas imported in the several places where they respectively reside. The purpose for which these samples have been procured is to ascertain the relation which they bear in quality and in price to the teas imported by the East-India Company into the United Kingdom. At the request of this Board, the Lords of the Committee of Privy Council for Trade, having applied to the Commissioners of Excise for the names of such firms or houses of tea-brokers by whom the greatest quantities of tea have been purchased at the East-India Company's sales, have been furnished with a list in which the name of your firm appears.

I am directed by the Board to request that you will be pleased to communicate to me the name of the persons whom you would recommend for the purpose of assisting in the examination of the said samples.

As it is the wish of the Board that the examination should be entered upon with the least possible delay, a messenger will wait upon you to-morrow for any answer which you may be pleased to return to this communication.

Sir,

The Commissioners for the affairs of India being desirous that the examination of such of the samples of foreign teas as have been received from His Majesty's Consuls should be entered upon forthwith, I am directed to request that you will move the Commissioners of Excise to order one of their officers to attend at the India Board in Cannon Row at eleven o'clock to-morrow morning, to witness the opening of the packages containing the said samples, and to take such precautions as he may deem to be necessary for the safe custody thereof.

- (22.) Memorandum by B. S. Jones, Esquire, dated at the India Board, 15th March 1830.

The tea brokers who were invited to examine the samples of foreign tea attended at the India-Board Office on Monday the 15th February.

There were also in attendance Mr. Goodhall, the East-India Company's Tea warehouse-keeper; Mr. Hunt, one of the clerks in his office; Mr. Hume, assistant secretary to the Board of Trade; and Mr. Jones, assistant secretary to the India Board.

The tea brokers, after conferring together, observed, that although they were willing to enter immediately upon the examination of the samples, it would better suit their convenience if the examination could be postponed until after the conclusion of a tea sale which was about to take place at the East-India House; and they mentioned Monday the 15th March as the day when they should be quite at liberty to inspect and examine the said samples. Lord Ellenborough and Mr. Herries respectively acquiesced in this proposal.

It was suggested, that labels should be affixed to the *sides* of the several packages of the teas, and numbered from 1 to 103 (being the total number of the samples); and that the *tops* of the packages, on which are marked the prices paid by the Consuls for the teas, should be taken off, and placed out of the sight of the brokers.

This was accordingly done previously to the meeting which took place on the 15th March, when the brokers drew samples for the purpose of being removed to their respective abodes, where they could, more conveniently than at the India-Board Office, subject the teas to the usual tests. Samples were also taken by Mr. Goodhall, the East-India Company's Tea warehouse-keeper.

(Signed) B. S. JONES.

- (23.) Copy of a Letter from B. S. Jones, Esquire, to J. C. Freeling, Esquire, dated at the India Board, 16th March 1830.

Sir,

In reference to my Letter of the 8th ultimo, I beg to inform you, that the tea brokers attended yesterday for the purpose of examining the samples of foreign tea forwarded by His Majesty's Consuls to the Commissioners for the affairs of India. As the chambers in which the said samples have been deposited are ill adapted to the process of examination, the brokers have judged it necessary that each individual should be furnished with small samples, of about half a pound, of each parcel of tea, in order that they may severally examine the same at their own houses. They also expressed a wish to be permitted to inspect the tea in bulk, at such times as may suit their

their convenience respectively, instead of being obliged to come in a body for that purpose. If this latter request should be complied with, it will be necessary that I or some other person on the spot should have access to the chambers containing the teas; and as your officers, Mr. Snitch and Mr. Saunders, do not feel themselves warranted, without express authority from the Commissioners of the Excise, either to relinquish the custody of the tea, or to allow the samples to be forwarded to the tea brokers, I have to request that you will be pleased to move the said Commissioners to issue such orders as may facilitate the performance of the duty which has been assigned to the tea brokers.

I am, &c. &c.

(Signed) B. S. JONES.

Note.—To the foregoing Letter, a verbal Answer was conveyed to Mr. Jones, by the abovementioned Offices of Excise, who superintended the Removal of the Samples drawn by the Brokers, and delivered the Keys of the Chambers containing the Teas into Mr. Jones's hands.

(24.) Copy of a Letter from certain Firms of Tea Brokers to B. S. Jones, Esquire, dated London, 6th April 1830.

Sir,

In compliance with your request, we have separately examined the samples of teas received from the Honourable Board, and subsequently compared our estimate, the result of which we beg to subjoin.

We think it right to observe, that two of the samples of bohea are decidedly inferior in quality to any imported of late years by the Honourable the East-India Company. With reference to the samples of congo, which is the description of tea principally consumed in this country, (about two-thirds of the whole), there being in each quarterly sale nearly one hundred samples which sell at prices varying from 2s. to 3s. 3d. per lb., and as we are only furnished with five samples, it must be obvious that we can form but a limited opinion as to the relation which they bear in quality to those of the East-India Company.

The importations of pekoe, young hyson, and gunpowder are very uncertain, being chiefly in the privilege of the officers of the Company's ships, and vary very materially in quantity at different periods; consequently fine pekoe, when the quantity in the market has been large, has sold as low as 3s. 9d. per lb., but, from the present scarcity, cannot now be obtained under 5s. 6d. per lb. The prices we have therefore affixed are intended to illustrate the relative qualities and worth in a market moderately supplied, rather than the present value, which is unusually high.

We are, &c. &c.

No. 1.—PAPERS relating to the CULTIVATION of COFFEE in the EAST-INDIES.

(1.)—Extract of a Revenue Letter from the Bengal Government to the Court of Directors, dated 29th June 1826, respecting the Permission granted to Europeans to hold Lands on Lease for the Cultivation of Coffee.

Cultivation
of Coffee in the
East-Indies.

46. On our Proceedings of the annexed dates is recorded our correspondence with the Board of Revenue in the Lower Provinces, relative to certain applications which had been received from individuals for permission to hold land for the formation of coffee plantations.

47. Your Honourable Court will observe, that the Board were decided in their opinion as to the expediency of encouraging the speculation; and with reference to their sentiments regarding the fitness of the soil of India for the cultivation of coffee (founded, to a certain extent, upon practical experience); the low rate compared with the produce of other countries, at which it is expected that coffee, the growth of our own provinces, may be brought into the market; the rapid extension of consumption which this cheapness would induce; and the great national importance, both to England and India, of the creation, eventually probable, of a new article of export from the latter country, we were disposed fully to concur with them; and the disposition to enter on such speculations being greatly influenced by the abundance of capital at the moment, which might not long continue, it appeared to be important to lose no time in sanctioning the proposed arrangement.

48. We have, accordingly, as your Honourable Court will perceive, embodied in the form of a resolution the rules under which respectable individuals, properly authorized to reside in India, shall be permitted to rent land for the cultivation of coffee, it being indispensable, from the nature of the cultivation, that the grower should enjoy a lease of considerable length. By the provisions above referred to, we have, we trust, sufficiently provided for the protection of all interests connected with the soil or revenue, and we do not anticipate that any evils can possibly arise from the indulgence which we have deemed it expedient to shew to the first adventurers in a new branch of agriculture and commercial speculation.

(2.)—Minute of Mr. Trower, Member of the Board of Revenue at Calcutta, dated 25th March 1823.

After a deliberate consideration of the two applications transmitted by Government for the consideration and report of the Board of Revenue for the Lower Provinces, relative to permission to hold lands for the cultivation of coffee, I am of opinion that one of them may, without hesitation, be complied with as unobjectionable, and that the other at once be rejected.

It does not appear to me necessary that, in the event of the indulgence solicited being granted, any material alteration in the existing rules relative to Europeans holding lands, in farms or by purchase, should take place. By Section 3, Regulation XXXVIII, of 1793, Europeans are prohibited from purchasing or renting lands out of Calcutta, *without the sanction of the Governor General in Council*; and in Section 5 of the same Regulation, the rules to be observed when this sanction is granted are laid down.

It is sufficient therefore for the Government, on the present or in all future applications

tions of this nature, to grant or refuse the indulgence solicited without the necessity of a general revocation of existing rules, or of assigning any reasons for the decision they may think proper to pass.

Cultivation
of Coffee in the
East-Indies.

It has been observed, that the indigo planters have often fruitlessly prayed for this indulgence, and that there can be no doubt that the encouragement of the cultivation of indigo (considering the question as a national advantage) would be attended with much more extensive advantages than can be expected from the cultivation of coffee. Without entering into the question of the comparative advantages to be derived from the cultivation of indigo and coffee, I shall observe, that I do not think the cultivation of indigo would be benefited in any degree by the permission to Europeans to occupy lands as proprietors or farmers. Indigo so greatly impoverishes the soil (unless in lands subject to annual inundation), that the planters are compelled to seek new lands every second or third year. No indigo planter, therefore, would apply for permission to purchase lands, or to hold them on a long lease, for the exclusive purpose of cultivating indigo; and that they should hold them on any other grounds, and be placed on a footing with the natives, is on many accounts highly objectionable. It is a fact well known to every judge and collector in Bengal, that indigo planters are even now in the habit of compelling Ryots to receive advances for the cultivation of indigo, contrary to their interest and inclinations; and if this is now done whilst the planters have no authorized influence in the villages surrounding their factories, how much more would it be done when they became proprietors of the lands, or held them in long lease. I mention these circumstances in order to shew that there are great objections to extending the indulgence under consideration to indigo planters, and that it is not necessary for the improvement or encouragement of the cultivation of the plant so to do, whilst in regard to the cultivation of coffee a long lease is absolutely necessary. The coffee plant is at least four years before it arrives at maturity, and it continues to flourish for a period of twenty years or more. It is therefore evident, that the cultivation of coffee through the agency of agreements with the Ryots, in the same manner that the indigo cultivation is carried on, could never be effected.

The attempt to introduce the cultivation of coffee in India, so as to render the produce equal in quality to that now brought into the Europe markets, requires ample funds, and a certain degree of agricultural experience. It will be five or six years before its equality to that now used in Europe can be decided on; and if it proves inferior, the speculation would not, I conceive, be carried on. It must therefore at present be considered quite experimental, and, under these circumstances, I do not think it likely that numerous applications for similar indulgence will be made for some time to come; and even though they should, it rests with Government to grant or reject them.

It is observed in Mr. Secretary Mackenzie's letter, that the object appears to be one of national importance, and that his Lordship in Council is naturally disposed to afford to those who shall first embark on the undertaking every proper encouragement. On these grounds the application of Messrs. Wallich and Gordon appears to me to be highly deserving of his Lordship's support, as embracing both pecuniary funds and agricultural experience, which may be considered essentially necessary to secure success. It is for permission to hold one thousand beegahs of land for a period of twenty years, and states that the preliminary arrangements in regard to rent have already been entered into with the proprietor, and appears to me in every respect unobjectionable. It is to be presumed that the application is for lands at present untenanted by Ryots, in which case no other rules would appear to be necessary than those already in force under Section 5, Regulation XXXVIII. of 1793. If, however, there should be Ryots residing on the land, and who have hitherto cultivated parts of it for their own use under pottahs held from the proprietor, I am of opinion that Messrs. Wallich

Cultivation

East-Indies.

Wallich and Gordon should bind themselves by a heavy penalty not to compel the Ryots to cultivate coffee in opposition to their wishes, and that all engagements entered into with Ryots should be registered, or copies deposited, in the Collector's office.

The application of Mr. Locke, should, I think, be rejected, as it solicits permission to purchase lands; if it had been for the farm of lands for a stated period, I think there would have been no objection to its meeting with his Lordship's favourable support.

W. TROWER.

Revenue Board, 25th March 1823.

(3.)—Resolution of the Government of Bengal, passed 7th May 1824.

1. As far as a judgment can in such a case be formed until trial be made, there appears to be abundant reason to conclude that the cultivation of coffee may be successfully prosecuted in this country on an extensive scale, and that the article may indeed be produced at a cost considerably below that which the lowest prices hitherto known in the market would amply reimburse, while at the same time there is scarcely any thing of which the consumption is likely to experience so large an augmentation in the event of any material reduction of price.

2. The extension of the export trade of India is an object of the highest importance both to England and to India, and the introduction of a new branch of trade, such as that in question may eventually become, would be a great national benefit. The speculation appears, therefore, to be one which is in a high degree worthy of the support of Government. From the nature of the case it is indispensably necessary that those who undertake it should have an assured tenure in the lands appropriated to the cultivation for a considerable period of time; and although it is to be expected and desired that the natives will before long enter on the speculation, and be guided by the example set to them in the conduct of it, yet, to its early and successful introduction on a large scale, it appears to be essentially requisite to allow scope to European enterprise and intelligence.

3. The land required in such case will, it is probable, admit of easy demarcation, although, in the lower parts of Bengal at least, it may not be found practicable to procure a sufficient extent of suitable ground without some intermixture of land applicable only to other purposes; and his Lordship in Council would hope that little difficulty will be experienced in providing for the satisfactory adjustment of all claims, and the effectual protection of all rights, attaching to land to be used in the cultivation of coffee, or otherwise necessarily included within the limits of the plantation.

4. For this purpose, however, and especially for the protection of the Ryots and the security of the real interests of the speculators, it appears to be necessary to prescribe some special rules to be observed before any lands shall be occupied by Europeans, that the arrangements concluded by them with the owners and occupiers of land should be certified by the Collectors of the districts, and that the European planters should be held subject to the awards of those officers in all matters touching the payment of rent, the adjustment of boundaries, and the like, with an appeal, of course, to the Board of Revenue.

5. It appears to be for several reasons desirable that the tenure of the European planters should be that of leaseholders, not that of proprietors of the land. As to the terms of the lease, it seems to be unnecessary to lay down at present any general rule.

6. With

6. With the above sentiments, his Lordship in Council is pleased to resolve, That Europeans of respectability, being persons, of course, duly licensed as to residence, shall be authorized to take leases of land, for the cultivation of coffee, under the following conditions and restrictions :

7. Persons desirous of establishing coffee plantations shall, in the first instance, apply for the permission of Government to do so, stating the district in which they propose to have the establishment, and the quantity of land they wish to include in their plantations, and each of them. Such applications to be submitted through the Secretary to Government in the Territorial Department.

8. When permission is granted, the parties shall submit to the Collector of the district a detailed statement of the lands which they desire to occupy, and of the terms which they may have settled with the owners and occupants, including every one whom they may know to possess an interest in the lands ; this statement shall be in English, Persian, and Bengalee, if in Bengal ; and in English, Persian, and Hindostanee, if in Behar or in the Western Provinces ; and in English, Persian, and Orysa, if in Cuttack.

9. The Collector shall cause to be published on the land desired to be taken, or in the nearest haut or village, and shall likewise stick up in his cutcherry, an ishtahar, notifying the contents of the application, and requiring all persons who may desire to submit any representation in the matter to come forward in person, or by vakeel, within the period of one month.

10. Any representations which may be made to the Collectors in consequence of such notice will be duly investigated by him, and the result recorded in a regular proceeding.

11. If the result of such investigation shall appear to him to render objectionable the establishment of the proposed coffee plantation, the Collector shall report the circumstances to the Board of Revenue, and be guided by their instructions as to his further proceedings.

12. At the end of the period fixed in the ishtahar, if there shall not appear to be any objection to a compliance with the application of the party, the Collector shall either proceed himself to the spot, or shall depute the Pergunnah Canongoe, or other Aumeen, to measure and mark off the land proposed to be appropriated as a coffee plantation, and to take from the several parties interested therein the necessary deeds in favour of the planter, and from the planter the requisite engagements in favour of the parties.

13. When the whole is concluded, the Collector shall submit his proceedings to the Board of Revenue, who, if satisfied that all claims have been duly attended to and properly adjusted, will finally confirm the arrangement.

14. Persons licensed as above to hold lands will, of course, be chargeable with all expenses attending the measurement and demarcation of the same, and the other necessary investigations.

15. Lands occupied by Khoodkasht Ryots or other cultivators, enjoying a hereditary right of occupancy, must not, of course, be transferred without the consent of those persons.

16. Where the rents may be receivable by a Talookdar or other middle-man coming between the Ryots and the Zemindar or Sudder Malgoozar, the right of the latter to object to the arrangement will depend on the nature of the intermediate tenure ; but, in general, it is the desire of Government, that no lands should be taken by Europeans unless all parties possessing an interest in the soil or in the rents shall consent to the arrangement.

17. Europeans

Cultivation
of Coffee in the
East-Indies.

17. Europeans permitted to hold lands as above, must bind themselves to submit to the award of the Collector of the district, subject only to appeal to the Board of Revenue, in all matters relating to any rent or other consideration demanded from them on account of the land occupied by them, as well as in all disputes touching the possession of the lands, or any wells, watercourses, tanks, reservoirs, or the like.

18. The coffee plantation shall be liable to sale by the Collector in satisfaction of any award passed by him, if not otherwise satisfied, within such time as may be appointed by the Board of Revenue, to whom, in all cases requiring recourse to sale, a reference shall be made.

19. If any European licensed to occupy land for a coffee plantation shall violate the engagement into which he may enter, or shall usurp or violently disturb the possessions of his neighbours, or shall be otherwise guilty of any act in breach of the peace, the Governor General in Council reserves to himself the power of cancelling the license, and of directing the interest possessed by the offender in the plantation to be sold.

20. The Board of Revenue will be authorized to take such further security as they may deem necessary; but, in general, his Lordship in Council would presume that the plantation itself will afford sufficient security. Parties who may suffer in consequence of the annulment of a planter's license will also have their remedy in a suit in court.

21. It will frequently, his Lordship in Council presumes, be necessary to include in the planter's possession a certain quantity of land on which coffee cannot be grown, besides tanks and the like; and the plant requires the shelter of other shrubs or trees, which may at the same time be otherwise turned to profit. A certain latitude is therefore necessary, but the Board will see that it is not abused.

22. It will, of course, be the business of the Collector to see that an adequate rent is paid for all malgozaree lands included in a coffee plantation; and the tenure will be secured from the operation of a public sale for arrears of revenue under the provisions of Section 31, Reg. II., of 1822.

23. When a lease may be taken from a subordinate Talookdar, the planter must take the precaution of making the superior holder or holders parties to his engagement, that he may be secure from the consequences of default on the part of the lessor.

24. Subject to the above provisions, his Lordship is pleased to authorize Doctor Wallich and Mr. Gordon to hold the land for which they applied. They will be referred to the Board and the Collector for the final adjustment.

25. Mr. Locke's application to purchase 1,000 begahs of land is deemed inadmissible.

Ordered, That a Copy of the above Resolution be sent to the several Boards of Revenue and to the Commissioner in Cuttack, in order that the several Collectors subject to their respective authority may be instructed accordingly.

(4.)—Extract of Revenue Letter from the Court of Directors to the Government of Bengal, dated 10th September 1828, in reply to the Letter from Bengal of 29th June 1826.

20. We think with you that there is sufficient ground for expecting beneficial results from encouraging the cultivation of coffee in Bengal. As the rules you have established appear to us to provide for the protection of all interests connected with the soil or revenue, the measure has our full approbation.

(5.)—Extract

- (5.)—Extract of a Letter from the Court of Directors to the Government of Bengal, dated the 8th of July 1829, directing that Government to adhere to the Terms of their Resolution of 7th May 1824.

Cultivation
of Coffee in the
East-Indies.

The permission granted by you in 1824 to certain Europeans to hold portions of land on lease, for the purpose of making the experiment whether coffee could be advantageously cultivated in Bengal, cannot and must not be drawn into a precedent. The duration of the leases granted even for that purpose we deemed unnecessarily long; but as the quantity of land applied for was limited, and a doubtful experiment stood in need of peculiar encouragement, we, by our letter of 10th September 1828, sanctioned the indulgence which you had thought expedient to grant. We also considered that the case of coffee was peculiar, a considerable outlay being necessary to form the plantation, and a number of years elapsing before it yields any return. A certain length of tenure is required by these circumstances for the profitable cultivation of coffee; but these circumstances do not exist with regard to indigo. The cultivation of indigo is annual, and a single year, or at most a few years, will indemnify the cultivator for the expense he has incurred. We observed that at the time of granting the leases for the experimental cultivation of coffee, a strong line of distinction was drawn, and very properly, by the officers of your government, between the case of indigo and that of coffee. By the Minute of Mr. Trower, under date 25th March 1823, we see that the utility of any lease to the cultivator of indigo was altogether denied.

We direct that all the rules laid down, and all the securities provided by the resolution of government, dated 7th May 1824, shall be strictly observed in the case of every permission granted to an European to hold land on lease for the purpose of cultivation.

Under these securities we do not object to your granting permission to Europeans to hold lands on lease in their own names, for the cultivation of indigo and other agricultural products.

The length of the leases must in all cases be regulated with reference to the nature of the cultivation, and must not be greater than may be necessary to afford the undertaker the prospect of a fair remuneration for the capital he may expend. The leases must not in any case exceed the duration of twenty-one years, without a previous reference to us, and our express approbation.

It is not less important in the case of the transfer of leases than in that of the original grant, that government should be satisfied in regard to the respectability and good character of the individuals who are to hold them, and therefore the permission of government must be rendered necessary to every transfer of a lease held by an European.

No. 2.—CORRESPONDENCE relating to the CULTIVATION of COTTON and TOBACCO in the EAST-INDIES.

- (1.)—Copy of a Letter from the Secretary to the Committee of Privy Council for Trade to the Secretary to the Commissioners for the Affairs of India.

Sir,

Whitehall, 26th July 1828.

The attention of this Committee has lately been called to the possibility of improving the culture, in the East-Indies, of some articles which are now chiefly supplied by the United States of America; particularly in cotton and tobacco.

(7 h)

It

Cultivation of
Cotton & Tobacco
in the East-Indies.

It has been represented to their Lordships, that the cotton of India is inferior to that of Carolina, not through any inferiority in the soil in which it is grown, but through a defective mode of cultivation; and it is thought that this deficiency might be supplied by a judicious application of skill and capital.

The same representation is made as to tobacco.

A slight encouragement is about to be extended to the cotton of India, by the reduction of the import duty upon cotton-wool from six per cent. on the value to four-pence per cwt.; but, if the Lords of this Committee are rightly informed, this encouragement will not be sufficient to occasion the necessary improvement of the cotton, unless measures be taken in India for applying skill and capital to the cultivation.

The peculiar system of administration which the Legislature has sanctioned for British India, forbidding Europeans to settle in the country, prevents the operation of the encouragement ordinarily afforded by an extensive market and a favourable tariff.

But my Lords conceive that it may be quite consistent with the maintenance of that system to extend facilities, liberal in their character but limited in their extent, to British subjects, who may be disposed to settle in the cotton districts, and whose character, property, and knowledge, qualify them for the object required.

Their Lordships apprehend that the important article of indigo has flourished under encouragement of this nature.

Under these impressions, the Lords of this Committee direct me to request, that you will move the Commissioners for the Affairs of India to take these suggestions, as they regard both cotton and tobacco, into their consideration, and to communicate thereupon with the East-India Company.

The Court of Directors cannot fail to admit the importance of the object, and it is hoped that if they should not consider the suggestions of this Committee as pointing out the most advisable method, they will suggest some other method of obtaining it.

I am to add, that their Lordships are desirous of receiving the fullest information which the Commissioners may be able to afford them of the present state of the culture and trade of cotton and tobacco in the East-Indies.

I am, Sir,
your most obedient humble servant,

George Banks, Esq.
&c. &c. &c.

(2.)—Copy of a Letter from the Secretary to the India Board to the Secretary to the Court of Directors of the East-India Company.

Sir,

India Board, 2d August 1828.

I am directed by the Commissioners for the Affairs of India to request that you will lay before the Court of Directors of the East-India Company the accompanying copy of a letter which has been addressed to the Board by the direction of the Committee of Privy Council for Trade.

The Board are desirous of being furnished with the sentiments of the Court relative to their Lordships' suggestion as to the improvement of the cotton and tobacco of India; and also of receiving, at the earliest possible period, the information requested as to the present state of the culture of those articles.

I am, Sir,
your most obedient and humble servant,

Joseph Dart, Esq.

Cultivation of
Cotton & Tobacco
in the East-Indies.

SIR,

India Board, 22d September 1828.

The Commissioners for the Affairs of India, in compliance with the request of the Lords of Privy Council for Trade, as intimated by your letter of the 26th July last, have directed their attention to the suggestions of the Lords of Privy Council for Trade, regarding the possibility of improving the culture, in the East-Indies, of cotton and tobacco.

In pursuance of directions from the Commissioners for the Affairs of India, a copy of your letter of the 26th of July was by me transmitted to the Court of Directors, accompanied by a request that every information which it might be in the power of the Court of Directors to communicate on the subject therein referred to should be furnished at the earliest possible period.

I am now directed by the Commissioners for the Affairs of India to transmit to you, for the purpose of being laid before the Committee of Privy Council for Trade, the copy of a letter from Mr. Dart, dated the 5th instant, being in reply to that which I had the honour to address to him when enclosing a copy of your letter on the occasion above referred to.

I am, Sir,

your most obedient humble Servant,

Thomas Lack, Esq.

GEORGE BANKES.

(4).—Copy of a Letter from the Secretary to the Court of Directors of the East-India Company to the Secretary of the India Board.

SIR,

East-India House, 5th September 1828.

I have had the honour of receiving and laying before the Court of Directors your letter of the 2d ultimo, enclosing a copy of a letter which had been addressed to the Commissioners for the Affairs of India by the direction of the Committee of Privy Council for Trade, respecting a department of the agriculture and Commerce of India, to which the Court of Directors attach equal importance with his Majesty's Commissioners and the Lords of the Committee of Privy Council.

I am directed, in reply, to communicate to you the following observations:

There appear to be two points on which information is desired; first, the sentiments of the Court relative to the expediency of extending facilities to British subjects who may be disposed to engage in the cultivation and improvement of the cotton and tobacco of India, it being conceived that the important article of indigo has flourished under encouragement of this nature; and secondly, the present state of the culture and trade of cotton and tobacco in India.

1. With respect to the first point, I am directed to state, that the same encouragement on the part of the Indian Government is now afforded to the cultivation and trade of the articles in question, as to that of indigo, alluded to by the Lords of the Committee of Privy Council for Trade. Land is granted to speculators in these articles on the same terms as those in indigo; and a drawback of all duties is allowed on export to the United Kingdom.

2. With respect to the second point, namely, the present state of the culture and trade in the two articles in question, I am directed to communicate to you the following particulars; viz.

Cultivation of
Cotton & Tobacco
in the East-Indies.

Memorandum on the present State of the Culture and Trade of Cotton and Tobacco in the East-Indies.

The cotton shrub is indigenous throughout the Peninsula of India, from Ceylon in the South to the foot of the Himalayah Mountains in the North; and various kinds have long been known to the native cultivators; *viz.*, annual, biennial, and cotton of several years duration; some kinds scarcely reach the height of one foot, others attain ten or twelve feet, and some a still greater height. The species which is most generally indeed it may be said universally, in cultivation in India, is an annual shrub, a variety of the green seed kind, yielding a white pod; but even of this variety there are many sub-varieties, of some of which the wool is more easily separated from the seeds than of others. There are likewise cotton plants, with brown, yellow, ash-coloured, and iron-grey pods. Some of the species have black seeds, some green seeds, and there is cotton found with red seeds.

The introduction into India of new and better species, and of improved modes of preparing cotton for the European markets, has at various times during the last thirty years engaged the attention of the Court of Directors and of the Indian Governments, and also of the private residents; and the following kinds of Foreign cotton, and probably others, have become objects of experimental cultivation in various parts of India; *viz.*

Sea Island cotton,

Barbadoes cotton,

Brazil cotton,

Bourbon cotton, both of the green seed kind and the black seed varieties.

Cotton from China.

It would be matter of gratification if it could be said that success had attended these endeavours, but the native cultivators do not appear to have given any, or at most very little attention to the subject; and all the experiments on a scale of commercial speculation which have been conducted by Europeans have been confined to the Bourbon species, to which the Court of Directors, in consequence of representations of its superior quality and usefulness, gave particular encouragement, by importing into India a large supply of seed during several years; but the cultivation has been checked by an unlooked-for difficulty, namely, that the consumption of cotton having a long silky staple is very limited, and that the demand of the British or Foreign manufacturer does not require, and consequently purchasers cannot be found for, a large supply of Bourbon cotton.

The latest experiment for the introduction of Foreign cotton known to the Court is that of the Marchioness of Hastings, who having procured from England, in the year 1823, a new supply of seeds of the Brazil and Barbadoes cottons, cultivated the same under her own inspection at her Ladyship's farm near Barrackpore, and distributed the seeds amongst the husbandmen in the neighbourhood. Part of the cotton thus raised from the Brazil and Barbadoes' seeds was delivered to the commercial residents at the Company's factories of Santipore and Hurripaul, for the purpose of being wrought up into muslins, some pieces of which are now in the Company's warehouse in London; but whether the natives have continued to cultivate the species of cotton thus placed within their immediate reach does not appear.

The delicate fabrics of Dacca were at all times manufactured entirely from the cotton of that district, which is the finest of all the cotton produced in India, and is probably the finest in the world; but the growth of this particular kind of Dacca cotton is limited to a space of about forty miles in length by less than three in breadth, along the Banks of the Megna, about twenty miles north of the sea. An attempt was made in the years 1790 and 1791 to encourage the cultivation of this species of Dacca cotton

cotton in the other parts of Bengal; and the collectors of the revenue, with the residents at the commercial factories, were directed to distribute the seeds amongst the native cultivators; but the endeavour failed of success. Cultivation of Cotton & Tobacco in the East-Indies.

The Court of Directors are in possession of various reports from the Company's revenue and commercial servants, and others, upon the culture and management of cotton in several parts of India, in which the times of sowing, gathering, and other particulars are set forth with great attention to details, shewing also the tenures of land. The information contained in these documents might be useful if digested into an abstract, but it would require much time for the performance of such an abstract.

Bengal, it is well known, does not produce, and probably never did produce, a greater supply of cotton than is required for its internal consumption; and during the periods when the Company's investment of cotton manufactures for exportation to London was in its once large and flourishing state, and, at the same time, there was an active demand for the like goods by the French, Dutch, and Danish merchants, the quantity of cotton grown in the Bengal provinces did not equal one eighth part of the quantity worked up there into piece goods. The necessary supply was imported from the Deccan, the Dooab, and various parts of the Mahratta country; and it appears that the value of the quantities of cotton which passed the then Frontier Custom House of Manjee, at the confluence of the River Gogra with the Ganges, amounted, in one particular year, to a crore of rupees; but a great portion of this Foreign cotton was exported from Calcutta by sea.

The treaty of the Nabob Vizier of the year 1801, and treaties with other Native princes, have, however, transferred to the Company the sovereignty over some of the central provinces of India, which afford cotton in great abundance; and the supplies of cotton which arrive at Calcutta are now classed as British produce; very little cotton produced in countries beyond the British frontier being now imported into the Company's provinces.* The quality of the cotton, however, remains as hitherto; and, as, from its shortness of fibre, it is not considered suitable to the purposes of the British manufacturer, it meets with little encouragement in Britain; and Indian cotton has for some time past been selling at a lower price in London than its original cost in Calcutta.

Besides the general defect of shortness of staple, Indian cotton is liable to objection on account of its not being sufficiently cleansed from the seeds, leaves, and other matters; to remedy which, the Court of Directors obtained from America patterns of the most approved machines in use in Georgia and Carolina for separating the wool of the cotton from its seeds; and they also, in the year 1813, engaged the services of Mr. Bernard Metcalfe, a very respectable man, who had for some years carried on the business of a cleaner of cotton in Georgia; but this person, after residing in India some time, finding that his endeavours to induce the Natives to use American machines were fruitless, gave up the employment, and retired from India altogether.

Fort Saint George.

The cotton trade of the Company's territories under the presidency of Fort St. George is next to be considered.

The Northern Circars, which extend about 500 miles along the coast of Coromandel, from the river Kistnah to the borders of Cuttack, have, from very early times, been the seat of an important and extensive manufacture of cotton piece goods, of which the descriptions of calicoes known as Madras long cloths and Sallampores were the chief; and, with Masulipatam dyed handkerchiefs and other kinds of goods for the African and West-India trade, have, until lately, been in great demand. Masulipatam goods have, however, for some years been entirely superseded by the manufactures of Manchester and Glasgow; and in all appearance the Northern Circars will, at no distant period of time, be deprived of the manufacture of white calicoes also.

The cotton which is grown in the Northern Circars is neither abundant in quantity nor good in quality; the weavers have depended for a considerable part of the supply of their raw material upon the Mahratta countries to the westward, from which cheaper and better cotton was brought by persons termed Lombadies, who travelled down to the coast at the proper season of the year in large bodies, and took back salt, betel, copper, and other merchandize in return.

As all the cotton which was brought from Berar, the Deccan, and other countries of the interior, was conveyed by land, the Mahratta cotton was dearer at the sea-ports than the cotton which was carried to Calcutta by water; and it does not appear that cotton has at any time been an article of export by sea from the Northern Circars.

The districts to the southward and to the westward of Madras afford cotton of better staple than the Northern Circars; and the East-India Company have had considerable factories for the provision of long cloths and Salampores in the territories to the southward of the presidency; but the crops of these southern provinces being much subject to the casualty of uncertain seasons, the price of the cotton has been thereby enhanced,

enhanced, and the goods were dearer than those of the northern districts. The calicoes of the southern division of the Indian peninsula were early supplanted in the European market by British manufactures.

Cultivation of Cotton & Tobacco in the East-Indies.

Endeavours to establish the cultivation of superior kinds of cotton in the southern division of the Madras territories have been long in the course of progress. Bourbon cotton and Brazil cotton have been cultivated by the Company's servants and by private residents; and it is understood the cultivation of Bourbon cotton from seed originally imported by the Company is still carried on to some extent by a private resident at Tinnevely. The person before noticed as sent by the court to introduce the American method of cleaning cotton resided in these districts.

The districts of Canara and Malabar, on the western coast of India, constitute part of the Madras presidency, and there is some trade in cotton between the province of Canara and Bombay; but the cotton exported is not the produce of Canara, but of the countries above the Ghauts.

The East-India Company continue at present to maintain factories in the southern division of the peninsula, where cotton is provided chiefly for exportation to China in the Company's Europe ships, which touch at Madras on their outward voyage from England; except which, the export trade of cotton from the presidency of Madras to foreign places is not considerable, as the following statement shews:

any in the world; and these countries produce cotton more abundantly than any other part of the British Dominions in India, the provinces in the Doab, of the Jumna and Ganges excepted, but the quality of the Surat cotton, by which general name this produce is known, is, in common with all other Indian cotton, of a short staple, and therefore not suitable to the British manufacturers.

Many endeavours have been made by European residents, chiefly the servants of the Company, for the amelioration of the cotton grown in the Bombay territories. Land has been granted for that purpose, and every necessary assistance appears to have been afforded by Government, but the attempts at improvement have been confined to the introduction of Bourbon cotton only, and have not been attended with success. No quantity of improved cotton has been sent to England from this side of India; and if the preceding observations as to the absence of demand for cotton of a long silky fibre be well founded, it cannot be expedient to extend the cultivation of this particular kind in any part of India.

The Company's Botanic Garden at Calcutta is probably capable of furnishing experimental cultivators with different varieties of the best cotton plants, and, considering the general opinion which is entertained of the peculiar fitness of the Bombay territories for the cultivation of cotton, it would seem to be highly desirable that other kinds than the Bourbon should be tried upon the western side of India.

The Port of Bombay is the general emporium for all the cotton produced on the western side of India, and for much that is grown in the interior.

If the cotton exported by the Company from Bombay to China, in the year 1825-26, be added to the general quantities exported, as shewn in the subjoined account, the total export of cotton from Bombay in that year (being the latest of which the accounts are received in London) would be found to have exceeded sixty millions of pounds; and the total of the exports of cotton from British India, in the same year, must have been little or nothing short of an hundred millions of pounds weight.

INDIAN TOBACCO.

Tobacco is cultivated in every part of Hindostan. The general opinion is, that it is a plant of comparatively modern introduction into India; the practice of smoking hemp leaves and other intoxicating drugs is, however, very ancient.

Cultivation of
Cotton & Tobacco
in the East-Indies.

The tobacco grown in the Mahratta territories is the most esteemed, in particular that which is produced near Bilsea, a town in Malwa. Bengal does not yield good tobacco; but the Company's territories in the Guzerat, being principally of a rich black soil, are considered to be eminently suitable to its cultivation.

Small quantities of tobacco have no unfrequently been brought from India, as specimens. About ten years ago some private merchants transmitted from Bombay a regular consignment of about twenty thousand pounds weight of Guzerat tobacco; but the result was unfavourable, and it has not been repeated.

The Bombay Government, in the year 1823, sent to the Court about eighty pounds of tobacco, the produce of the district of Pelland, under the collectorate of Kaira, which they represented to be of a very superior description, and the staple produce of that Pergunnah. This tobacco was of two kinds; the price paid to the cultivator for one of which seems to have been about three-halfpence per pound, and for the other one-penny per pound, exclusive of any charge for management, packing, or transportation to the Presidency.

This tobacco was delivered to Messrs. Taddy and Co., eminent tobaccoists in London, with a request that they would carefully ascertain its quality. Messrs. Taddy and Co. manufactured it into cheroots, snuff, and cut or smoking tobacco, which they returned to the Court of Directors, expressing their regret that they could not hold out any expectation of its being an article of advantageous commerce at that time, particularly from the very low price of American tobacco, and from the superior colour of the Turkey tobacco, which the Guzerat tobacco very much resembled in quality and flavour, and that unless it could be brought of a very fine gold colour, it could not sell for more than two-pence per pound, and that for exportation.

Messrs. Taddy and Co. furnished the Court with a paper of information, and also with specimens of Turkey and American tobacco, which, with part of the Kaira tobacco manufactured by Messrs. Taddy and Co. as above, were transmitted by the Court to Bombay.

On their arrival at Bombay, the Governor in Council forwarded the specimens to the collector of Kaira, who forthwith proceeded to obtain other samples, in the provision of which the collector notices (in a letter dated 29th April 1826) that more care was bestowed than was usual in growing tobacco for general exportation; that if the colour and flavour of it should be suited to the European market, and it proved an article worth exporting to England, further improvement in its quality could, by additional attention to its culture, be effected, and that he considered these specimens superior to the specimens sent to the Court in 1823, particularly in point of colour. The cost of this tobacco was not sent to the Court.

These specimens were, with the like request as on the former occasion, delivered to Messrs. Taddy and Co., who reported that they considered the quality superior to that of 1823; but from the nature of the tobacco, being full of oil, it required to be packed up still drier, and rather loose, as in Turkey; that they could not hold out any encouragement as regards the consumption in this country; but, as a fair trial, recommended the importation of about one hundred bales, to be sold at the Company's sales.

The Court requested Messrs. Taddy and Co. would proceed to manufacture the tobacco in various ways, and report their further opinion thereupon; with which

Cultivation of

to the East-Indies.

Messrs. Taddy and Co. complied, and reported that it was not fit for cut tobacco, which is the article of principal consumption* in this country, and that it would not answer for cheroots, being a different leaf from that used in India for the manufacture of them; that it appeared to answer better for snuff, but the consumption would never make it answer as an article of commerce.

The matter at present rests in this stage; but the Court will probably resume the consideration very soon.

I have the honour to be, Sir,
your most obedient humble servant,
J. DART, Sec^y.

(5.)—Copy of a Letter from the President of the India Board to the Chairman and Deputy Chairman of the East-India Company.

GENTLEMEN,

India Board, 7th October 1828.

I have considered, with much attention, the letter of Mr. Dart to Mr. Banks, dated the 5th ultimo, respecting the culture of cotton and tobacco in the East-Indies.

I know you must be strongly impressed with a sense of the great importance of improving the cotton grown in the East-Indies, of extending thereby the export trade of the territories of the East-India Company, and of rendering this country independent of foreign nations for the supply of the raw material of our most considerable manufacture; and I am therefore satisfied that you will give your favourable consideration to the suggestions I am about to offer to you on this subject.

It appears, undoubtedly, that measures have been taken at different times by the East-India Company for introducing into India the culture of various sorts of foreign cotton; and it seems, that on one occasion a gentleman conversant with the cleaning of cotton in Georgia was engaged by the East-India Company for the purpose of giving instruction in the use of the American machines for separating the wool of the cotton from its seeds, but that the attempts hitherto made for the improvement of the culture and management of cotton have not been successful. It does not appear, however, that experiments have been made in many different parts of India for the purpose of ascertaining whether in some districts of that vast country in which the cotton plant is indigenous it may not be possible to raise some of the superior sorts of foreign cotton. Experiments made in the Botanical Garden of Calcutta, where cotton plants from different soils and climates are cultivated in the same soil and in the same climate, must necessarily be productive of no satisfactory result.

I must therefore suggest to you the expediency of attempting, on a small scale, the cultivation of all the finer sorts of foreign cotton in different and distant parts of India, under every different circumstance of soil and climate; and of transmitting to England, cleaned in the American manner, and with every precaution to protect them from the weather, samples of the cotton so raised, for the purpose of comparison with the cottons of other countries.

As it is understood that the value of cotton depends very much upon the care with which it is cleaned, and on its being protected from the weather, it is deserving of your consideration whether it may not be advisable for the East-India Company to receive a portion of the land tax in cotton at a fair valuation, and to manage, on its own account, the cleaning of the cotton so received, and its transport to the place of shipment

* N. B.—The price in London, at this time, of a whole cargo of Virginia tobacco is twopence per lb. or twopence halfpenny per lb.

shipment. Should it be found practicable to raise, in India, any of the superior sorts of cotton, it would be for the interest of the East-India Company to encourage the culture of such cotton by taking it at a higher valuation in the payment of the land tax. Cultivation of Cotton & Tobacco in the East-Indies.

I cannot entertain a doubt of the disposition of the East India Company to permit the residence, in the interior of India, of British merchants who may be willing to employ their knowledge and their capital in the culture of an article of which the production, in any quantity, of a superior quality, would conduce in so great a degree to the interests not only of the East-India Company, but of this country.

I trust that you will persevere in your endeavours to produce a species of tobacco suitable to the British market.

I have the honour to be, Gentlemen,
your most obedient and humble servant,
ELLENBOROUGH.

The Chairman and Deputy Chairman
of the East-India Company.

(6.)—Copy of a Letter from the Secretary of the India Board to the Secretary of the Board of Trade.

SIR,

India Board, 16th October 1828.

In reference to your letter of the 26th of July last, I have received the directions of the Commissioners for the Affairs of India to transmit to you, for the information of the Lords of the Committee for Trade, the inclosed copy of a letter which has been addressed by the President of this Board to the Chairman and Deputy Chairman of the East-India Company, on the subject of the culture of cotton and tobacco in the East-Indies.

I am, Sir,

your most obedient and humble servant,
GEORGE BANKES.

Thomas Lack, Esq.

(7.)—Copy of a Dispatch from the Court of Directors of the East-India Company to the Governor in Council at Bombay, dated 18th February 1829.

1. During many years past we have been strongly impressed with a sense of the great importance of improving the quality of the cotton grown in India, and have directed our attention to the introduction of new and better species of cotton, with the view of rendering the produce of British India fit for the general consumption of the manufactures of Great Britain; and it would have been matter of great satisfaction if our endeavours had been attended with success.

2. This failure has not been owing to want of co-operation on the part of our Governments, supplies of cotton seed having been imported into India, and land granted to Europeans for experimental cultivation; but the experiments, upon a scale of commercial usefulness, have been confined to the Bourbon species; and the cultivation of this kind, which we understand is of the black seed description, and yields a longer staple than any other kind of cotton, has been checked by the unexpected difficulty of finding a market for the increasing supply of long and silky cotton. As to the former supply of this cotton, there has been added, since the year 1823, the growth of Egypt to a considerable extent, and of other places, which has produced an important change in the relative value of the green seed and black seed kinds, and at the present time the stock of black seed cotton on hand bears a much larger proportion to the consumption than the green American descriptions.

Cultivation of
Cotton & Tobacco
in the East-Indies.

3. The native cultivators do not appear to have given any, or at best very little, attention to the improvement of their cotton; on the contrary, limiting our present observations to the produce of your Presidency, the late consignments of cotton to England are represented to be almost entirely deficient of every property which is esteemed by the British manufacturer, insomuch that many persons who were previously in the habit of using Surat cotton have discontinued their purchases; and it is only from very great improvement that they can be expected to return to its use.

4. The course of public affairs at the present time has caused us to direct our attention in an especial manner to this subject, and to look to India for the means of rendering Great Britain independent of foreign countries for a considerable portion of a raw material upon which her most valuable manufacture depends; the effecting of which would also lead to another not less important object, namely, that at the same time as it would add to the agricultural resources of our extensive possessions, it would also facilitate the remittance of the annually increasing political and commercial debt, for which India becomes liable to the mother country.

5. We are informed that at least three-fourths of the cotton which is manufactured in Britain is the produce of Georgia and New Orleans in the United States of America, being known in mercantile language as Georgia Upland Cotton, and New Orleans Cotton, and is exclusively the wool of the species of cotton which produces a green seed; and we are further informed, which is exceedingly material in the present consideration, that the Bombay cottons, particularly those of the growth of the districts near Surat and Broach, are little or nothing inferior to the upland American descriptions above named, the item of cleanness alone excepted; and that such Indian cotton might readily be brought into competition with the Upland American. We are aware that it has been stated in a letter in your commercial department, that the seed of the cotton which is cultivated near Surat is black, but as the cotton usually grown throughout India is almost universally of the green seed species, and we find that the seeds which are very commonly intermixed with the cotton imported into London from Bombay are also green, we think it probable that your information may not have been correct on this point; but whether the seed of the Surat cotton be green or black is of secondary importance, as the produce which it yields, when carefully prepared, is much esteemed in the British market.

6. Assuming that the quality and condition of the Surat cotton shall become equal to that of the common Upland American cotton, the next question that presents itself is the rate of cost at which it can be produced. The price of the American cotton delivered at New York has been lately at ten cents or fivepence sterling per pound, and that cotton now sells in London at from sixpence to sixpence halfpenny per pound; but both the rate of cost at New York and the selling price in London are considered to be uncommonly low, the produce of cotton in the year 1827 having exceeded the general demand, and the importations into Great Britain of the year 1828, although much short of the preceding year's supply, have been very ample. The price at the place of growth of the Broach cotton, which was exported to China per Hythe on the Company's account, in the year 1826-27, appears by the invoice to have been 120 rupees per Surat candy, including factory charges, which, at the rate of exchange of two shillings sterling the rupee, gives the cost three-pence three farthings per pound, to which, being added the expense of transportation to the Presidency and packing for Europe, amounting to ten or fifteen per cent. more, gives a price of at least four-pence per pound for inferior cotton deliverable at Bombay, and worth in London at the present time not more than four-pence halfpenny per pound, against good cotton, deliverable at New York at the cost price of five-pence per pound, and selling in London for sixpence halfpenny per pound.

7. A slight encouragement has been extended by Parliament during the last Session
(9 Geo.

(9 Geo. 4. cap. 76.) to the cotton in India (in common with that of other British possessions), by the reduction of the import duty from its former rate of 6 per cent. on the value to a fixed rate of four-pence per cwt., so that the quantity of cotton in a Surat bale will pay a consumption duty of about one shilling and two-pence, whereas the same quantity of Upland American cotton pays about twelve shillings; and, as we think it may be reasonably supposed that the present exceedingly low prices of cotton wool of all kinds may not be permanent, the recent alteration in the consumption duty will operate in favour of Indian cotton in an increased ratio as the general prices of cotton may increase; but it must be evident from what we have above said, that this parliamentary encouragement will not be sufficient to introduce Indian cotton into general use in the home market, unless measures shall be taken in India for applying greater skill as well as capital to its cultivation.

8. Experience has convinced us, that the improved cultivation of Indian cotton, so as to render it fit for the British market, will not be effected merely by the countenance and occasional encouragement of Government. We have therefore resolved that an experimental plantation for cotton shall be established, at the expence of the State, within the territories under your authority. The manner of carrying this into operation, we are disposed to commit entirely to your judgment and local knowledge. It appears, however, that it will be advisable, in the first instance, that a piece of ground, either in the possession of Government or to be hired for the purpose, should be selected in the most suitable place that can be found, say to the extent of perhaps 200 English acres; and that a person, either native or European, of competent skill in this branch of agriculture, should be entrusted with its management, at a moderate monthly salary, under the general superintendence of the collector of the district, or the magistrate, or the commercial resident, as you may appoint.

9. The first object to be attempted should be careful cultivation of cotton raised from seed of the best of the indigenous plants of India, such as the Bhyratta Copass of Bengal, (for a supply of which you will make application to our Governor General in Council), or the best kinds at present grown about Surat or Broach, which will give sufficient employment for the first season, and before a second season shall arrive we will endeavour to furnish you with a supply of green seed from Georgia and New Orleans, which you will afterwards cultivate exclusively, or in addition to the native kinds, as experience shall render advisable.

10. You will issue instructions for furnishing the necessary funds from the territorial department, and keep us fully advised of your proceedings herein. The cotton which may be grown upon this plantation you will consign to London, with a proper mark of distinction.

11. We have before shewn, that the cleaning of the cotton from its seeds and impurities is a point of nearly equal importance with that of improving its *staple*. Upon a former occasion we transmitted to India machines for cleaning cotton, of the best construction at that time in use in the United States of America, and we also engaged the services of a person who had long resided in Georgia, and was skilled in the use of them; but the object failed of success. We understand that the excellent condition * in which American cotton is now brought to market is owing to the almost exclusive use of a machine of more modern invention, called Whitney's Saw Gin, which is represented to be so simple in its construction, and so easily worked, that the cleaning of the cotton, which was formerly performed by separate tradesmen, is confided to the management of

* The American cotton is not only free from any admixture of seeds, but is also divested in the most complete manner of broken fragments of the pods, and other extraneous matters, as well as of discoloured and damaged heads. Indian cotton, on the contrary, is greatly mixed with both. Samples of several kinds of cotton, with the current selling prices in London at this time, are sent in the packet, together with a list of the same.

Cultivation of

slaves. We shall supply you with a number of Whitney's Saw Gins as soon as they can be procured.

12. Although it is our desire that your attention should be chiefly given to the improvement of the native cotton which we have particularly specified, and to the introduction of the upland American cotton, we see it right to suggest to you the expediency of further attempting, on a small scale, in different parts of the territories under your government, the cultivation of all the finer sorts of foreign cottons, in different situations as to soil, and particularly in districts bordering on the sea-coast.

13. We shall endeavour to procure various kinds of cotton seed, and transmit them to you for this purpose.

14. After what has been stated in the preceding paragraphs, it cannot be necessary to go into any lengthened course of observation to impress upon our Governor in Council the importance of the object of our present dispatch; and we confidently rely upon your zealous co-operation in carrying into immediate effect the experimental measure which we have directed you to institute on the part of the Company.

15. It will still be expedient that the native growers of cotton should be incited to the improvement of its cultivation, and particularly to the rendering it more merchantable by careful cleaning; to which end you will give publicity to your undertaking, and distribute the seed gratis, or at a low price, as you shall see right; and also award premiums, or other encouragement, to such natives as may exhibit the most approved specimens, not less in quantity than five Surat candies, whether grown from the seed supplied to them from the Government farm, or from seed of the indigenous sorts.

16. At the same time, it appears desirable to obtain the advantage of the application of European skill and industry to the attainment of the object in view; to which end you are authorised to grant to British subjects (resident in India under our authority), properly qualified by character and by command of capital, a sufficient quantity of government land for the establishment of a cotton plantation, the land to be secured to the parties on lease at a low rent for a term of years, on the condition of its being used for the cultivation of cotton; and in the event of difficulty occurring as to government lands of a proper description and in suitable situations, permission may be granted to such British subjects to enter into engagements, under the usual limitations, with native proprietors for land to be applied to the like purpose.

(8.)—Copy of a Dispatch from the Court of Directors of the East-India Company to the Governor General in Council in Bengal, dated 8th July 1829.

1. You will have observed in our letter in this department to the Presidency of Bombay, under date the 18th February last, that the course of public affairs at the present time has caused us to direct our attention in an especial manner to the great importance of improving the cotton grown in India, and also to the introduction of the seed of new and better species, together with the best machines for cleaning cotton from its seeds and impurities, with the view of rendering the produce of our territorial possessions fit for the general consumption of the manufactures of Great Britain. Extract of our letter to Bombay is sent in the present packet for more immediate reference, as also extract of our letter to Bombay in the commercial department, dated 3d June, upon the same subject.

2. We are in daily expectation of the arrival in London of the cotton seed noticed in our letter to Bombay, and also of a supply of machines for cleaning cotton; and it is our intention to send to your presidency a portion of the cotton seed, together with one or two of the machines.

3. We

3. We advise you at this time of the intended consignment, in order that you may issue such preliminary instructions as to you shall seem proper, for selecting a favourable situation or situations for instituting, upon the arrival of the seeds, an experimental cultivation of cotton upon a small scale; and we doubt not of your zealous co-operation in carrying this object into successful effect.

4. We have perused the papers laid before you by Mr. Assistant-Surgeon Henderson, commencing 4th October 1825, and the subsequent correspondence with the Board of Trade thereupon, respecting the cultivation at Alighur of cotton which had been some years previously raised from American seeds of a casual importation into India. We observe with concern that this attempt has failed, as the Board of Trade, after advising with persons able to form a competent judgment of its quality, have in their report of 4th August 1826, pronounced it to be inferior to the common cotton of the country.

5. We have submitted the three samples of Mr. Henderson's cotton, received per *Minerva* in 1828, to the inspection of an experienced dealer, who reports that two of the samples appear to have been produced from North American upland seed, but are not superior in value to middling Bengal cotton. The third sample, from which the seed has not been separated, appears to possess a longer staple, but so little of the wool remains upon the seeds that it is difficult to form a full opinion; and cotton in such a state would be of no marketable value here.

6. We take the present opportunity of adverting to the specimens of cotton produced in the Tenasserim provinces, noticed in your letter in the secret department, dated 29th December 1826. The specimens in question, which were received per *Princess Charlotte of Wales* in 1828, are considered to be superior to any cotton that has been imported from Bengal, and, if in a perfect condition, would rank in the London market with very good Surat cotton and middling North American upland; but it is remarked, that this cotton, although not sufficiently divested of the seed, has nevertheless been somewhat injured in its staple by the process of cleaning to which it has been subjected. It is desirable that a supply of cotton seed should be obtained (if not already done) from the Tenasserim coast, for cultivation in our possessions in the Peninsula of India, and particularly in the maritime districts.

7. Tobacco is another article of commerce, the consumption of which is very great, and although it is believed not to be an indigenous production of India, it is nevertheless in general cultivation there. Occasional small consignments of tobacco have been made to Europe by the Company and by individuals, but without success, arising from the cheapness of American tobacco, and the higher cost and inferior quality of the Indian.

8. In the year 1824 our Bombay Government sent to London a sample of Kaira tobacco, which we entrusted to the management of persons eminent in that business, but the result was unfavourable. Part of this tobacco, manufactured in various ways, was sent back to Bombay, with specimens of approved kinds of American and Turkey tobacco; and in 1827 our Bombay Government sent us a further parcel of Kaira tobacco, prepared with greater care than the former. This has been delivered to the same manufacturer, whose report admits it to be superior to the former parcel, but still objectionable and unfit for the British market.

9. The difference between the freight of ships from India and from America will, perhaps, be a permanent obstacle to the general importation of Indian tobacco into Europe, unless it can be overcome by superiority of quality; but even if a market cannot be opened in Europe for the Indian tobacco, an improvement in the article for the internal consumption of India is a very desirable object.

10. Under this view we have taken measures for procuring supplies of tobacco seed from Virginia and Maryland, a portion of which will be sent to you with the cotton seeds mentioned in the preceding paragraphs.

Cultivation of
Cotton & Tobacco
in the East-Indies.

(9).—Copy of a Dispatch from the Court of Directors of the East-India Company to the Governor in Council at Bombay, dated 4th November 1829.

1. Our letters, noticed in the margin, have acquainted you with the measures we were taking for obtaining from the United States of America various kinds of cotton seeds, as well as the most approved machines used in the Southern States of North America for cleaning cotton wool from its seeds and impurities.

2. We have received the first supply of American cotton seeds, which have been drawn from the crop of the year 1828. This supply comprises seeds of the species known as Upland Georgia cotton, and seeds of the cotton of Louisiana, known in commerce as New Orleans cotton, both being of the description called by the planters "green seed cotton," the wool of which adheres to the seed with a considerable degree of tenacity, fully as much as in the common cotton of India. These are the kinds of American cotton which are most extensively used by the manufacturers of Britain. We also transmit a supply of the seeds of Sea Island cotton (which are black), the wool of which is much esteemed for the fineness and length of its fibre.

3. We have likewise received six of the machines for cleaning cotton, called Whitney's Saw Gins, two of which we shall transmit to your Presidency with the cotton seeds. We have desired our agent to send us a description of the method of using the saw gins in North America, and you shall be furnished with a copy as soon as it comes to hand. It is sufficiently clear, from an inspection of the machine, that it is put into motion by manual labour, by means of a wheel and winch, with a revolving strap upon the small pulley wheel that forms part of the machine itself, as shewn in a sketch drawing which will be found in the packet. The large wheel or first motion is very simple; upon which account we suppose, it has not been transmitted to us from America with the machines. A wheel of this kind can however be readily constructed in India.

4. We have caused a trial to be made in our presence of the working of the saw gin upon a small quantity of Indian cotton happening to be in our warehouses, which had been very imperfectly, if at all, divested of its seeds; and although this experiment was made under the disadvantage of the cotton being old, very dry, and much pressed together, the result seemed entirely to establish the merit of the invention.

5. The Whitney Machine, which it is our desire to introduce into India, has been noticed in the Parliamentary Papers of the year 1828, in a report of an American Committee of Commerce, where it is said to be "so simple in its construction, and so easily worked and managed, that the negroes in the southern states are employed to work it." We cannot, therefore, entertain any doubt of the saw gins being suitable to the process of cleaning cotton by the natives of India. We also conclude, that the Indian workmen will be competent to fabricate such machines for general use; but in order to facilitate the bringing them into practice without loss of time, it is our intention to send you some separate sets of the circular saws, which are of iron (not steel), as the only part of the machine in the making of which there can be difficulty. These detached saws will also be useful as patterns for the native smiths; for the guidance of whom we propose also to send a complete set of all the other parts of the machine which are of metal.

6. You will receive with the before-mentioned articles a small quantity of cotton seed of the growth of Demerara in South America, which, although it is not unknown in India, we are desirous should be planted as a renewed experiment. It is of the black seed kind, like the Sea Island, of which the wool readily parts from the seeds, and probably will not require the application of a saw gin. This kind of cotton is cultivated with great success in the Brazils.

7. We shall also send a case containing twenty-five pounds of Maryland tobacco seed,

seed and another case containing two pounds of Virginia tobacco seed, which, we are informed, will be sufficient for cultivation on a large scale, and it may therefore be tried experimentally in a variety of situations.

8. We take the present opportunity of adverting to the specimens of Guzerat tobacco, the growth of the country in the vicinity of Kaira, which you consigned to us by the ship *Pyramus* in the year 1827. We delivered this tobacco to Messrs. Taddy and Company, the manufacturers who had on a former occasion examined and reported upon an experimental consignment of tobacco from your presidency of the year 1823, the unfavourable result of which, with samples of the produce, and also of Turkey and American tobacco, were transmitted with our letter in the Commercial department of 2d of February 1825.

9. Your consignment of tobacco by the *Pyramus* has been manufactured in various ways by the same persons; and although the quality was pronounced superior to that of your consignment of the year 1823, we did not, considering the very low price of American tobacco, see it advisable to prosecute the importation as an article of commerce.

10. Letters from Messrs. Taddy and Company, dated 20th September 1827 and the 19th February 1828, are sent in the packet.

11. We transmit in the packet the following papers, having reference to the culture of cotton and tobacco; viz.

1. Remarks on the culture of cotton in the United states of America, which we have received from our agent with the cotton seeds.

2. Paper on the culture of tobacco in Virginia, received in like manner.

3. Statement of the best method of cultivating New Orleans cotton, received in like manner.

4. Extract of Captain Basil Hall's Travels in North America, so far as regards the cultivation of cotton; but we must remark, that this author's statement of the mode of cleaning cotton by what he denominates Whitney's saw gin, is not applicable to the machines now sent to you, but evidently refers to another American gin, probably like that which we sent to India several years ago.

12. We are strongly impressed with the opinion that nothing but attention and perseverance is required to make Indian cotton-wool a productive article of export to Europe; and there is no commercial object connected with our Indian possessions of greater national importance. We desire, therefore, that the arrival of the saw gins in India be made matter of general publicity; and that such extracts from the papers now sent in the packet as you may consider likely to be useful to the general cultivators be published at intervals in the newspapers, and that the methods pointed out be tried, as far as circumstances will permit, in the management of the Government farm.

13. We shall divide the consignments of gins and seeds upon the two first ships that may sail for Bombay.

14. We have prepared the like supply of machines and seeds for consignment to our Government of Bengal.

Sir,

With reference to a request made by Lord Ellenborough in October 1828, and to my letter of the 10th of February last, I am directed by Lord Aberdeen to transmit to you, for the information of Lord Ellenborough, a statement, which has been received from His Majesty's Acting Consul General at Washington, of the number of vessels belonging to the United States which have cleared out from ports in that country for ports beyond the Cape of Good Hope in each year since 1813.

I am, Sir,

Your most obedient humble Servant,

SELECT COMMITTEE OF THE HOUSE OF LORDS. 1829

(Enclosure, No. 1.)

Letter from John M'Tavish, Esq., Acting Consul General at Washington, to John Bidwell, Esq., dated 23d March 1829.

Sir,

In obedience to the Earl of Aberdeen's direction, conveyed to me in your letter of 2d October 1828, I have now the honour to transmit, for his Lordship's information, a list of the number of vessels belonging to the United States, which have cleared from their ports for ports beyond the Cape of Good Hope in each year since 1813.

It was only yesterday that I received the necessary information from the ports of Salem and Boston, in the state of Massachusetts, to enable me to complete the enclosed document; a circumstance which will account for the delay that has attended its transmission to the Foreign Office.

It was found impracticable to obtain any return of the East-India trade of New York previously to 1820, or that of Philadelphia beyond the year 1821; I have, therefore, as you will discover, substituted in red ink hypothetical returns for the absent periods, founded upon an average declared from the trade of the subsequent years; 1814 being the last year of the war, I have left the line appropriated to it blank.

I propose forwarding a duplicate of the enclosed list by the packet for Liverpool, to sail from New York on the 1st of April.

I have the honour to be, Sir,

Your obedient humble Servant,

for Anthony St. John Baker,

JOHN M'TAVISH.

No. 1.—Letter from Sir Daniel Bayley, Consul General at St. Petersburg, to John Backhouse Esq., dated 6-18 December 1828.

Sir,

I have the honour to acknowledge the receipt of your circular despatch, dated 18th November, communicating to me the directions of the Earl of Aberdeen to use my best endeavours to collect and transmit to you the most correct information as to the consumption of tea in Russia, together with statements of the prices of different qualities, and the rates of duties levied upon them, in English money, at the existing rate of exchange.

In compliance with his Lordship's orders, I have taken every means to obtain the information required, and now proceed to communicate the results.

Nearly the whole of the tea destined for the consumption of this empire is brought from Kiachta, where it is obtained from the Chinese by barter; of course it is not possible

possible to ascertain the cost at its first purchase. From thence it is mainly conveyed by caravans, with other valuable articles, to the great annual fair held at Negénei Novogorod, and even there it is chiefly disposed of by barter. From thence it is distributed to the various parts of this vast empire, and then only it becomes an article of monied trade, and that prices can be fixed.

The exportation of tea from Russia is of small extent, and is only permitted to merchants in the possession of special licenses granted by the Minister of Finance, in pursuance of an oukaze, dated 16th August 1826, up to the 31st December of the same year, which licenses are to continue in force for four years from the last-mentioned date, when other arrangements will be made.

Even these licenses confine exportation to Berlin, Frankfort on the Maine, Hamburgh, Vienna, Paris, Amsterdam, Leipsic, Constantinople, Trieste, Naples, Leghorn, Genoa, Marseilles, Cadiz and Lisbon, and to other places out of Russia, but not nearer than the fore-mentioned, and provided Russian Consuls are established there.

By these regulations it is required that the boxes of tea destined for exportation should be sealed at St. Petersburg, Moscow, or Odessa, accompanied by a permit; and on presentation of a certificate, signed by the Consul resident at the place to which the tea is destined, of its true delivery, the full duty is restored to the exporter, by the proper authorities of the place from whence the tea was despatched, with exception of green tea of the finer description, for the exportation of which the duty upon common green tea only is returned; but for coarse brick tea no drawback whatever is allowed.

The following are the rates of duty upon tea:—

	per Russ. lb.		s.	d.	
Green-Julan Monich Isitsun and Lancha	R° 1 57½	Exc. 10½	—	1 6½	p' Eng. lb.
Ditto - Common sorts	1 45	do.	—	1 5	do.
Black - Kammenoi	1 97½	do.	—	1 11	do.
Ditto - Barchoff, Ui, and ordinary sorts	1 85	do.	—	1 9½	do.
Ditto coarse, in square lumps, called brick tea	0 2½	—	—	—	—

From the most authentic sources of information I have had access to, it appears that the importation of tea into the empire has been as follows:—

				Value reported.	
				P ^{ds} . lbs.	R°
In 1824, to Kiachta	P ^{ds} 133,387	2	154,197	0

Other custom-houses				
Total	P ^{ds}				
Of which exported during these four years only				
Thus leaving	P ^{ds}				

On an average P^a 144,097 6 lbs. of the value of R^b 5,671,726½, or 5,187,496 lbs. English, value £248,346. 7s. 4d. sterling, taking the exchange at 10½d. per ruble, which may therefore be fairly considered as the annual average of the quantity of tea consumed within the empire. I have reason to believe, however, that the value above stated is estimated exclusive of the duty.

I have not been able to obtain any information of the extent of the importation of tea during the present year; but, from the reduction in the retail prices of common descriptions of tea usually consumed in families, I am led to believe that the importation has exceeded the usual average.

On the other hand, however, I subjoin an extract of an article which appeared very lately in the Russian newspapers upon this subject, showing the result of the trade in tea brought for disposal to the annual fair at Negënei Novogorod, held last summer.

The assortment of tea consisted of—

9,500	common sized seroons	family flower tea.
8,000	- - do.	common tea.
7,500	- - do.	family tea.
7,500	- - do.	common tea.
3,500	large seroons (called half size)	of Sansine Tea, and of a quality resembling Sansine.
2,000	ditto of common sorts.	
<hr/>		
38,000	seroons of the descriptions known under the general name of	Baichoff teas.
476	ditto of green tea.	
4,000	ditto of brick tea.	
<hr/>		
42,476	seroons of tea brought from Kiachta, and	
1,000	ditto Baichoff teas from Moscow, which had remained there from	
	last year, making	
<hr/>		
43,476	seroons of all sizes.	
<hr/>		

The value of these may be estimated on an average, inclusive of the duties—

					R^b
At R^b 370	per seroon for the	Baichoff tea	-	-	14,430,000

Making, at the exchange of 10½d. per R^b . £662,025 sterling.

The black tea was almost entirely purchased by Armenians and Tartars from Astrachan, and a small portion by Russian merchants carrying on trade with Asia.

In all 29,000 seroons were sold at the fair, to the amount of about eleven millions of rubles, and the whole of what remained over was despatched for disposal to Moscow and to this place.

Enclosed I have added a Price-Current received from one of the principal retail dealers in tea in this city, which I have reduced into sterling money per English lb. ; and from all the information I have been enabled to collect, the prices are nearly the same at all the principal cities in the empire.

It may not be useless to add, that though the importation of tea by sea is prohibited at all the Russian ports in Europe, excepting Odessa, yet that it is admitted at all the Russian ports in Asia at the same duties as by custom-houses on the frontier.

I have thus endeavoured to execute Lord Aberdeen's commands, and I have used my best exertions to do so fully and correctly. It will give me great pleasure to be informed that I have performed the service in a manner satisfactory to his Lordship.

I have the honour, &c. &c. &c.

SELECT COMMITTEE OF THE HOUSE OF LORDS. 1287

(3) Letter from Henry Canning, Esq., Consul General at Hamburgh, to John Bidwell, Esq., dated 16th January 1829.

Sir,

In reference to your letter of the 13th of November, conveying to me the Earl of Aberdeen's desire to use my best endeavours to collect and transmit to you the most correct information as to the price and consumption of tea in the Hanse Towns, together with the statements of the prices of the different qualities, and the rates of duty levied on them on importation, and of drawback allowed on exportation; I beg leave to send you the enclosed table, which contains the required information as regards the prices of tea, and the duties and drawbacks.

As regards the consumption, there is a difficulty in stating it with accuracy: the public records at the Custom-house here do not afford it, and private information may not always be correct.

I enclose the copy of a letter which I have received upon this subject from ———, who, you will find, states the importation of tea into Hamburgh at between 10,000 and 20,000 quarter-boxes annually; but I collect, from the lists of general importations which are published here annually by private persons, that the quantity of tea imported in the last five years has been as follows; namely,—

1824	14,328 chests
1825	32,815
1826	21,614
1827	36,364
1828	12,831

Making an average importation in five years of 23,590 chests, or, at 70 lbs. net per chest, of 1,650,300 pounds per annum.

Neither of these quantities can, however, be fixed upon as quite correct. The quantity actually consumed in Hamburgh is only a small part of the whole importation, as the greater part goes to the interior of Germany.

At Bremen and Lubeck, the same difficulty in stating the importation of tea with accuracy prevails as here, but in neither is the quantity important; and I beg leave to refer to the enclosed copies of what the British Vice-Consuls in those towns have reported on the subject.

I have, &c. &c.

(Signed) HENRY CANNING.

HENRY CANNING.
Consul General.

(Enclosure, No. 2.)

(5.) Letter from ——— to Mr. Henry Canning, dated Hamburg,
13th January 1829.

—“ I must ask your pardon for the procrastination of an answer to your letter of the 16th December, concerning the tea trade of Hamburg. I am very sorry the registers of the customs, which have no other object but to secure the small duty of 1s. 5d. per cent. on part of the importation, and of 1 per mille on part of the exportation, without providing for a drawback, will scarcely offer sufficient information for giving an official answer to most of your questions.

“ The importation of tea in the port of Hamburg, variable and accidental, may be rated at between 10,000 and 20,000 quarter-boxes annually. The extraordinary importation of 357,000 quarter-boxes in 1827 must purely be attributed to their smaller size. The market of Hamburg, as well as that of Holland, appears overstocked : prices since 1816 are reduced to one-third. At the end of December 1827, 28,000 to 30,000 quarter-boxes remained unsold. The exportation, owing to the impossibility of controlling quantities below a certain weight and value, can still less be stated with any degree of certainty.

“ The safest method would be, to deduct the probable average consumption of 200,000 to 250,000 boxes from the importation, which, by an alteration of duties in Holland, has been reduced to 12,500 quarter-boxes in 1828. The late failures in the United States, the balance of two or three millions of dollars due to the American customs, the loss of the Dutch Trading Company, computed at 2,000,000 of florins during the last four years, sufficiently prove the trade has of late been carried on without benefit. The consumption in the interior of Germany, though slowly increasing, is very moderate. Smuggling to any extent must be out of the question ; fine black tea, the staple consumption of Great Britain, scarcely appearing in the Hamburg market.

“ Insignificant as these details, for which I was obliged to address myself to the persons better acquainted with commercial business, must appear to you, I hope you will consider them as a proof of my sincere wish to substitute private information for official ignorance.”

(Enclosure, No. 3.)

(6.) Extract of a Letter from the British Vice-Consul at Bremen, addressed to Mr. Henry Canning, dated Bremen, 20th December 1828.

—“ In reply to your letter of the 13th instant, I have the honour to state, that the consumption of tea in this city cannot be exactly ascertained ; it is however not considerable. Its importation is chiefly from the United States, and never in whole cargoes, but occupying a small portion of ship-room. Its exportation from hence is chiefly East Friesland, and to the countries on the Upper Weser.

“ In 1826, were imported 84,122 lbs., amounting to R^r 46,735.

“ In 1827, 346,888 lbs. amounting to R^r 231,259 : and the quantity on hand at this moment may be estimated at circa 4,000 chests, averaging 240,000 lbs.”

(Enclosure, No. 4.)

(7.) Extract of a Letter from the British Vice-Consul at Lubeck, dated 22d December 1828, addressed to Mr. Henry Canning.

—" I was duly favoured with your letter of the 15th instant, and left no time in attending to its contents.

" There is no wholesale trade in tea here, and but a very irregular one in the retail line. The retail dealers in this article draw their supplies mostly from Hamburg, but sometimes from Copenhagen and Bremen; it is however impossible to ascertain the quantity consumed here, since almost all the principal families have their tea sent them by the post-coach from Hamburg, in quantities of 5 lbs. 10 lbs. or 25 lbs., of which no account whatever is required here; and even what the dealers receive is but very partially entered at the Custom-house, the parcels being given in at whatever quantities the receivers choose to state.

" There is no inquisitorial establishment here for examining the goods received; and the Custom-house has so little control over them, that the head of that department has himself declared, that it is impossible to ascertain either the quantity imported or that consumed."

(8.) Letter from D. R. Morier, Esq., Consul General at Paris, to the Earl of Aberdeen, dated 28th November 1828.

My Lord,

In obedience to your Lordship's directions, contained in Mr. Backhouse's letter dated November 13th, marked "Circular," instructing me to transmit to your Lordship's department the most correct information as to the consumption of tea in France, &c., I have the honour to forward herewith the enclosed statement, which, with respect to the quantity imported, is founded upon a memorandum furnished me from the administration of the Customs, with an assurance that it may be depended on as official, and accompanied by the remark, that they have no other means of judging of the actual *consumption* of tea in France but by the amount of imports.

I have the honour to be, &c.

- (12.) Letter from Frederick Lindeman, Esq., Consul General at Palermo, to John Backhouse, Esq., dated 17th December 1828.

Sir,

In reply to the official circular of the 13th ult. I have the honour to state, that the consumption of tea in the island of Sicily is very trifling, about twenty chests per annum. The Sicilians seldom make use of it, except in illness as a medicine, and that of very inferior quality. It is chiefly imported from the United States of America. The duty, without regard to quality, is one shilling and threepence sterling per pound, English weight, at the current rate of exchange of 58 taris per pound sterling: the retail price for Bohea four shillings per pound, and for green six shillings per pound, English weight. There is no drawback allowed on re-exportation of tea.

- (13.) Letter from W. Taylor Money, Esq., Consul General at Venice, to John Backhouse, Esq., dated 3d January 1829.

Sir,

On receipt of your letter of the 13th of November last, by which you communicated to me the desire of the Earl of Aberdeen, that I should collect and transmit to you the most correct information as to the consumption of tea in the Austrian States in the Adriatic; I immediately requested His Majesty's Consuls at Trieste, Fiume, and Ragusa to furnish me with such particulars as might relate to their several districts.

I have delayed my reply in consequence of not hearing from Mr. Turner at Ragusa; but as I am credibly informed that the consumption of tea there is very insignificant, I now transmit a return, which I hope will be found sufficient.

The article in question is so little in use in the southern parts of the Austrian States, that it does not appear that the total consumption amounts to half a ton annually.

Tea may enter the free ports of Trieste, Fiume, and Ragusa, without payment of duty; but on leaving those places for the interior, the duty levied is at the rate of 1s. 5½d. sterling per lb. avoirdupois for the gross weight on all qualities indiscriminately, which corresponds with the importation duty at Venice.

No drawback is allowed on re-exportation; but, on the contrary, tea is liable to a small export duty of about one farthing per pound avoirdupois.

Except at Trieste, no other tea is known than a very inferior Hyson. The prices are inserted in the return herewith transmitted.

I am, &c.

John Backhouse, Esq.

Sir,

I duly was honoured with your circular of 13th November last, and am very sorry to say it is not in my power to convey the information required, respecting the consumption of tea in Prussia. Here it cannot be procured; but I have been endeavouring to procure it from Berlin, though without success; yet I hope still to get it, as I am about visiting that city, when it shall be immediately forwarded.

- (16.) Letter from Christian Koch, Esq., Consul at Frankfort, to John Backhouse, Esq., dated 28th December 1828.

Sir,

With reference to my communication under date of the 29th November, I have herewith the honour to state the information I have been able to collect respecting the prices, duties, consumption, and qualities of tea in this part of Germany.

The list below comprises the Confederate States, which levy a consumption duty on that article, on which none of them allows drawback. The printed tariffs of them are too bulky to admit being sent by post, and shall be transmitted by the first messenger passing through Frankfort.

In other parts of the Confederation, with the exception of Austria, the duties levied on tea deserve more the denomination of toll or turnpikes than duty, such as in this free city, where the cwt. pays tenpence on entry. The present prices of tea in this town are as follows :—

The quantity of tea consumed in this city cannot be exactly ascertained, as it forms an article of trade on which no consumption duty is levied, 10d. not deserving that denomination, and consequently no drawback allowed on it that might lead to regular registers. The modicity of the duty on entry on all articles in general is the cause that the entry books are not so explicit as to admit of a separation of the quantity of tea consumed and exports into the interior of the country; but I have ascertained that the importation amounted in the year 1817 to 380 cwt. and in 1826 to 112 cwt., on which the duty of 10d. per lb. was paid. I have reason to believe that not more than 100 cwt. of it were consumed in the town and territory of Frankfort, forming a population

lation of 70,000 inhabitants, and thus about one-eighth of a pound for each per annum; but this valuation cannot serve as a general basis for Germany, as in some parts of it no tea is drunk, and in others very little, the people being in the habit of drinking coffee for breakfast, and beer or wine at their other meals.

Notwithstanding the great activity and the extended mercantile connections of this free city, the tea branch cannot be of great consequence, as Hamburgh and Bremen supply the north of Germany and part of the Baltic coast, and Holland the country along the Rhine, as well as other German provinces near her frontiers; whilst the south, Bavaria, Wurtemberg, Baden, Darmstadt, and Nassau, chiefly consume coffee, as more congenial to beer and wine countries; and thus the *debouché* into them becomes retail business to no considerable extent. Prussia receives supplies from Hamburgh and her Baltic ports, and Austria chiefly by Trieste; but both countries import also tea from Russia, which goes by the name of Caravan Tea, and of which the first qualities find likewise their way into this part of Germany although in small quantities, and sell at high prices, as stated in the list.

Very seldom purchases for this town have hitherto been made at the East-India sales in London. On the outset, this may have been caused by the length of the journey, aversion against sea voyages, want of knowledge of the language, and the considerable travelling expenses. Most of these impediments having been lessened by steam navigation and improved land conveyance, I think it likely that the tea sales at the India-House may in future be as well attended as the indigo sales, to which Frankfort houses regularly send their agents.

In former times, tea for this place was purchased of the East-India Company at Copenhagen and the Swedish Company at Gottenburg, but chiefly then, and now, in Holland.

The two former Companies have ceased to exist, and Holland meets latterly with great competition in the French port of Havre de Grace, visited so much by American vessels, that the orders upon tea may be considered now as divided between Dutch and French Ports.

The French government has, sub-hand, been so extremely active in facilitating inland water communication, that by means of the Canal de Monsieur and the Canal de Besançon, the North Sea will shortly be united with the Rhine at Strasboerg, and thus Havre, with its known activity, will easily meet Dutch competition in tea and all colonial produce. In the prospectus and plan of the undertaking, the union of the North Sea with the Mediterranean has been promised through this canal, which, by contract, is to be finished at latest in 1830.

The great difference in the importation of tea into Frankfort, in 1817, 380 cwt., in 1826, 112 cwt., I attribute chiefly to supplies from France, although the very low prices of grain may likewise have caused a diminution in the consumption of tea in Germany, which there belongs more to the luxuries than to the necessities of life, whilst coffee ranks more amongst the latter. Under the aforesaid circumstances, it is my opinion that the most correct calculation of the quantity of tea consumed in Germany can only be made by collecting information of the imports in the following sea-ports, *viz.* Amsterdam, Rotterdam, Antwerp, Hamburgh, Bremen, Havre, Bordeaux, Trieste, and Copenhagen. Neither Prussia nor Italian ports supply Inner Germany with tea at present.

I am, &c.

CHRISTIAN KOCH.

(17.) Mr. Consul Fenwick's Report on the Consumption and Price of Tea in Denmark; dated Elsinore, 13th December 1828.

The China trade has, ever since the year 1732, been a monopoly to the present Asiatic Company, and with the exception of two private expeditions made by royal authority in 1816 and 1817, against a recognizance to the Company, and with their sanction, in consequence of the dilapidated state of their finances, no importation of tea has been made to Denmark from any place beyond the Cape of Good Hope, as being in opposition with the privileges of the Company.

The duty paid by the Company is two per cent. *ad valorem*, whereas the duty on importations from ports on this side the Cape of Good Hope is about 14*d.* on green teas, and 10½*d.* on crown teas, which amounts to a prohibition; and it can thus be admitted that the consumption of the country is wholly supplied by the Company.

On the other hand, the activity of the Company has, ever since the peace in 1814, been exclusively limited to the wants of the country, both in consequence of their want of capital and of the prices at which they are enabled to dispose of their teas for consumption; and the extent of their sales accordingly affords a safe and correct criterion respecting the consumption of the country.

In April 1825 the stock of teas of different kinds in the hands	lbs.
of the Company was about - - - - -	434,000
In 1827 a direct supply was received of about - - - - -	717,000
	<hr/>
	1,151,000

In September 1828, after their sale which is calculated to	
supply the wants until next spring, they retained on hand	lbs.
about - - - - -	635,000
Thus the consumption in four years may be computed at -	516,000
Or yearly about - - - - -	129,000

The prices of the last sales were about as follows :

Bohea, 20 <i>d.</i>	}	Souchong, 30 <i>d.</i> to 32 <i>d.</i>
Congo, 28 <i>d.</i> to 30 <i>d.</i>		Patri Zioun Ziorang, 34 <i>d.</i>
Campoy, 29 <i>d.</i> to 32 <i>d.</i>		Hyson, 48 <i>d.</i> to 49 <i>d.</i>

And fine teas, in lead canisters, proportionally higher.

Teas from any port this side the Cape of Good Hope may be landed, in bond, at Copenhagen, and when re-exported pay a transit duty of about 18*d.* per 100 lbs. for crown teas, and 54*d.* for green teas; but this trade is not carried to any extent, as they cannot be entered for consumption, unless at a high duty, as stated above.

No drawback is allowed on the re-exportation of tea from Denmark.

(18.) Letter from De Hocheplé Larpent, Esq., Consul at Antwerp, to John Backhouse, Esq., dated 28th November 1828.

Sir,

In reply to your circular of the 13th instant, I have the honour to transmit, for the information of the Earl of Aberdeen, a statement of the law and tariff respecting the importation of tea into the Netherlands, as it existed formerly. By this it appears that all exportation or transit of tea was prohibited.

The teas which were imported into this kingdom were consequently for consumption alone; and, according to the best information I can obtain, it appears that the quantity of tea consumed yearly in the southern provinces is not more than 2,000 chests of 75 lbs. each; whilst in the northern provinces the consumption yearly may be rated as high as from 25,000 to 27,000. Thus the whole consumption of tea of all kinds in this kingdom cannot be estimated at more than 30,000 chests of 75lbs. each, or about 2,000,000 lbs. per annum.

This is the most accurate information I have been able to procure upon this subject.

I have likewise the honour to enclose No. 2, being a statement of the present law and tariff upon the importation and exportation of teas, showing likewise the prices of the various sorts in sterling and English cwt., likewise the precise quantity said to be consumed in the southern provinces from the best source, which appears rather less than 2,000 chests.

But as there is now a general entrepôt established in this city, as well as in other ports, it is supposed that a much larger quantity of tea will be imported in future direct from China, in Netherland vessels, the greater part for exportation.

But this law has not been long enough in operation to enable me to form any opinion as to the probable quantity of tea that will be imported in future.

I have likewise to observe, that since the 1st of January last I do not find a single chest of tea set down as imported into Antwerp.

I am, &c.

John Backhouse, Esq.

(21.) Letter from James de Hocheplé Larpent, Esq., Consul at Antwerp, to John Bidwell, Esq., dated 2d December 1828.

Sir,

In addition to the information contained in my letter of the 27th ult., No. 17, respecting the duties upon tea, I have the honour to acquaint you, that in pursuance of the law of 31st March 1828, a copy of which is herewith transmitted, relating to the "free exportation and importation of merchandize from and into the kingdom of the Netherlands;"

His Majesty, by a special decree, dated 10th September 1828, has been pleased, as an act of grace and favour, to allow the extension of that law to the port of Antwerp; although the terms of the said law have not yet been complied with, by the erection of a suitable building for a general entrepôt.

It is therefore established under the authority of this special decree, that all sorts of tea may be imported into Antwerp from any country whatsoever by *sea*, and re-exported by *sea* to any other country, without paying any duties whatsoever, not even those of transit.

The necessary measures are however in operation for the erection of an entrepôt.

I have, &c.

(22.)—(Enclosure, No. 1.)

Nous Guillaume, par la Grâce de Dieu Roy des Pays Bas, Prince d'Orange Nassau, Grand Duc de Luxembourg, &c.

A tous ceux qui les présentes verront, salut. Savoir faisons;

Ayant pris en considération qu'il importe dans l'intérêt du commerce et de la navigation de ne négliger aucune mesure qui puisse servir à encourager les mouvemens d'importation et d'exportation dans les ports du royaume;

Le Conseil d'Etat entendu, et de commun accord avec les Etats Généraux, avons arrêté et arrêtons les dispositions suivantes;

Article 1st. Par extension de la Loi générale sur les Droits d'Entrée, de Sortie et de Transit, du 26 Août 1822 (Journal Officiel, No. 38), Nous accorderons aux principales villes de commerce maritime dans lesquelles les bâtimens et établissemens nécessaires à cet fin seront fournis et entretenus, soit par ces villes mêmes, soit par le commerce, la faculté de déposer dans un Entrepôt Général les marchandises, pouvant jouir de la faveur d'Entrepôt qui y sont importées par mer, et de les re-exporter ensuite également par mer, en franchise de droit, soit dans leurs emballages ou futailles primitifs, soit après avoir été assorties ou manipulées et transférées dans d'autres, elles devront toutefois être accompagnées des documens requis, et soumises aux précautions nécessaires pour prévenir tout abus.

2d. Nous nous réservons néanmoins d'établir les exceptions nécessaires à la dite franchise des droits, soit sous le rapport de la nature des marchandises, soit à cause de leur destination particulière, en cas de ré-exportation; bien entendu que ces exceptions seront toujours d'une application générale, et ne pouvant jamais avoir d'effet retro-actif à l'égard des marchandises qui auroient été importées avant que les exceptions eussent été arrêtées et publiées.

3d. Par extension de l'Article 5, paragraphe 11, de la Loi générale, mentionnée plus

plus haut, l'exemption y stipulée recevra son application dans ce sens, s'il ne se présente pas d'occasion pour trans-border immédiatement les marchandises, elles pourront, moyennant des frais modérés à supporter par les intéressés, être déposées dans le magasin de l'administration, ou dans un autre local sûr, soit au premier bureau, soit à proximité de ce poste, pour être ensuite ré-exportées dans le délai d'un an après la date de l'emmagasinage.

Mandons et ordonnons, que la présente Loi soit insérée au Journal Officiel, et que nos ministres et autres autorités, qu'il concerne, tiennent strictement la main à son exécution.

Donné à la Haye, le 31 Mars, de l'an 1828, de notre règne le quinzième,

Considérant, &c. &c.

Avons résolu, &c.

Article 1^{er}—Que la ville d'Anvers jouira de la franchise des droits sur les marchandises qui entrent et sont ré-exportées par les moyens d'un entrepôt général, de la même manière qu'il a été décrété en faveur d'Amsterdam le 9 Mai dernier.

Article 2^a—Qu'en attendant l'établissement d'un nouvel entrepôt à Anvers, cet entrepôt sera institué provisoirement, et jusqu'à révocation, dans le ci-devant cloître St. Michel, actuellement occupé par l'entrepôt royal, et cela moyennant un loyer annuel à concéder au propriétaire; le tout en se soumettant aux formalités spéciales que l'administration des droits d'entrée et des accises trouvera convenable d'exiger pour prévenir les abus, &c. &c.

(24.) Letter from Alexander Ferrier, Esquire, Consul at Rotterdam, to John Backhouse, Esquire, dated 18th November 1828.

Sir,

In compliance with the directions of the Earl of Aberdeen, communicated to me in your circular of the 13th inst., I beg leave to transmit you the following information relative to the price and consumption of tea, and the duties payable on that article, in the kingdom of the Netherlands.

The annual importation of tea into the whole kingdom of the Netherlands, taken on an average of the last ten years, is 42,000 quarter-chests, and the consumption is estimated to be 40,000 per annum, about two-and-a-half million pounds.

The prices are now as follows:

	Price per pound.								
Bohea	-	-	45 to 55 cents, or	-	-	0	8	to 0	10 sterling.
Congo	-	-	75 to 130	-	-	1	1½	to 1	11½

Kempoy

	Price per pound.		s.	d.	s.	d.	
Kempoy - -	75 to 170	- - - -	1	1½	to	2	7 sterling.
Souchon - -	75 to 220	- - - -	1	1½	to	3	3
Pecco - - -	260 to 400	- - - -	3	11	to	6	0
Hyson Schin - -	75 to 125	- - - -	1	1½	to	1	10½
Hyson - - -	160 to 210	- - - -	2	5	to	3	2
Uxim - - -	90 to 150	- - - -	1	4½	to	2	3
Gunpowder -	200 to 300	- - - -	3	0	to	4	6

The duty inwards, and on tea entered for home consumption, is as follows :

If imported direct from China, or the Netherland possessions in the East-Indies, without breaking bulk on the voyage,

Bohea, or coarse congo, that is, congo under } f. 18 per 100 H. lb. about 1½ per
2 f. per lb. or 1s. 6d. per English lb. - - } English lb.

All other sorts - - - - - f. 34, about 3d. per ditto.

But if imported in Netherland vessels, then bohea and coarse congo pay only f. 7, about per English pound ¾ of a penny.

If imported from other parts, or in vessels that have broken bulk,

Bohea, or coarse congo - - - - - f. 51, about per English lb. 4½d.

No drawback is allowed ; on the contrary, on exportation an additional duty of 1½d. per English lb. is payable, without distinction of sorts. But tea, on entry inwards may be declared in *transit*, and then pays exactly one-fourth of the several rates of consumption duty specified above.

I have the honour to be, &c. &c.

(25.) Letter from James Stirling, Esquire, Consul at Genoa, to John Bidwell, Esquire, dated 30th November 1828.

Sir,

I have the honour to acknowledge the receipt of the circular letter of the 13th instant, received on the 24th, in answer to which I have to acquaint you, for the Earl of Aberdeen's information, that the annual consumption of tea in the Sardinian States (on the Continent), is about 2,500 kilogrammes, equal to 5,625 pounds English weight. The duty of entry is 2 francs 50 cents per kilogramme, which, at the exchange of 25 francs per pound sterling, is 2 shillings per 2 pounds 4 ounces English weight.

The re-exportation of tea by sea is 2,000 kilogrammes, equal to 4,500 pounds English weight, which pay 1 franc 20 cents per decimal quintal, or 1 shilling per 225 pounds English weight.

The actual price of pearl tea is from 3 livres 10 sous to 4 livres, or from 2 shillings and fourpence to 2 shillings and 8 pence sterling per Genoa pound.

The price of hyson tea is from 2 livres 16 sous to 3 livres 5 sous, or from 1 shilling and 10 pence to 2 shillings and 2 pence per Genoa pound.

The price of green tea is from 1 livre 10 sous to 2 livres, or from 1 shilling to 1 shilling and 4 pence per Genoa pound.

The price of black tea is from 1 livre 5 sous to 1 livre 10 sous, or from 10 pence to 1 shilling per Genoa pound.

The

The deposit in Port France of the different qualities of tea does not exceed 150 cases ; containing each 90 Genoese pounds, or $64\frac{1}{2}$ pounds English weight.

No drawback is allowed in this port, all goods being admitted in the Port France free of duty ; and when withdrawn from thence they pay the duty of entry, if such goods are for the consumption in the Sardinian States ; the transit duty, if they are re-exported by land ; and the duty of ostellaggio, if they are re-exported by sea.

I have the honour to be, &c.

John Bidwell, Esq.
&c. &c. &c.

(26.) Letter from John Falconer, Esquire, Consul at Leghorn, to John Bidwell, Esquire, dated 3d December 1828.

Sir,

When using my best endeavours to obey the directions contained in the circular of the 13th ult., it is necessary for me to remark, that, from the manner in which the Custom-house books are kept here, it is impossible to ascertain the quantity of tea imported ; but from the best information I have been enabled to procure from other sources the imports for the last seven years, in large and small chests (for they have not been distinguished from each other) have been nearly as follows ; viz. in 1821, 1822, 1823, 1824, 1825, 1826, 1827—chests 182, 407, 103, 555, 354, 548, 326 ; thereby averaging about 353 chests annually, which have almost entirely been brought from America.

The consumption of tea in Tuscany is chiefly confined to the foreigners who reside in Florence and Leghorn, the natives only using it medicinally.

A great part of it is exported to the Roman and Sicilian States, and to the Levant ; but as the Custom-house takes no cognizance of this, the quantity consumed in Tuscany cannot be ascertained, although it may be computed at from 3,000 to 4,000 lbs. annually.

The duty on importation of tea into the port and city of Leghorn is as follows : viz.

On Green Tea, of the finest quality, 3s. for every 100 lb.
Of inferior quality, 2s. for do.
On Black Teas, 1s. 6d. for do.

When sent into the interior of the country it pays a duty, when passing the gates of Leghorn, of seven-pence sterling per lb., but no drawback is allowed on exportation.

The wholesale prices at which teas sell here may be quoted as follows : viz.

Souchong	-	$\begin{smallmatrix} s. & d. \\ 1 & 4 \end{smallmatrix}$	to	$\begin{smallmatrix} s. & d. \\ 1 & 8 \end{smallmatrix}$	per pound.
Hyson	-	$\begin{smallmatrix} s. & d. \\ 1 & 8 \end{smallmatrix}$	to	$\begin{smallmatrix} s. & d. \\ 2 & 0 \end{smallmatrix}$	do.
Gunpowder	-	$\begin{smallmatrix} s. & d. \\ 2 & 4 \end{smallmatrix}$	to	$\begin{smallmatrix} s. & d. \\ 2 & 8 \end{smallmatrix}$	do.
Pearl	-	$\begin{smallmatrix} s. & d. \\ 2 & 2 \end{smallmatrix}$	to	$\begin{smallmatrix} s. & d. \\ 2 & 6 \end{smallmatrix}$	do.

It is to be observed, that all the above weights consist of twelve ounces to the pound.

I have the honour to be, &c.

John Bidwell, Esq.

(29.) Letter from George During, Esquire, Consul at Trieste, to John Backhouse, Esquire, dated 4th December 1828.

Sir,

In answer to the circular letter, dated Foreign Office, 13th ult., I have the honour to state, for the information of the Right Honourable the Secretary of State, the Earl of Aberdeen, the following particulars respecting the importation, price, and consumption of tea in this district, and also the duties to which it is subject.

The government, of which this place is the seat, comprises the city, port, and liberties of Trieste, the county of Gorizia, and the peninsula of Istria, which being maritime provinces, the whole is styled "Governo del Litorale," and contains about 300 m. inhabitants. The county of Gorizia (containing about 115 m. inhabitants) is alone subject to duties of customs; the other districts are exempt from them, and enjoy the advantages of a free port.

The consumption of tea in this government is so insignificant as to warrant the assertion that it is scarcely to be considered as an object of trade. It is used more as a medicine than as a necessary article of subsistence, or an agreeable beverage, except by the English families here resident, and a few others in the higher circles.

Only four qualities of tea are known here, as stated, with their respective prices, in the schedule here annexed. The importation in British vessels is limited to small parcels brought by masters of ships, and I am credibly informed has not amounted to 1,000 lbs. during the last nine years, the period I have been in office. A more considerable quantity (about 3,000 lbs.) was imported some years ago in an American ship, and left in commission with an English house here; but the greater part, notwithstanding the extreme lowness of the prices, still remains unsold, and I am assured that it is very doubtful whether wholesale buyers could be found for it at a reduction of 30 per cent.

In the city and liberties of Trieste, which is a free port, and also in Istria, as being beyond the line of custom-houses, there are no duties on this or any other articles of merchandize. There was, indeed, till lately, a duty of one half per cent. *ad valorem*, which has now ceased, the object for which it was levied, *viz.* to pay the debts contracted by the municipality during the war, being accomplished. The tea sent into the interior of the Austrian States, on passing the boundaries of the territory of Trieste, is subject to a duty of 54 kreutzers per lb. of Vienna, or one shilling and sixpence sterling per lb. English avoirdupois weight. No drawback is allowed; but tea may be bonded in large towns, or may be sent through the country for exportation to foreign parts, on paying a transit duty of 2½ florins per 100 lbs of Vienna, or five shillings and two-pence sterling for 112 lbs. English avoirdupois weight.

I understand that the consumption of tea in Vienna and the Northern Provinces of the Empire is much more considerable than in these parts; but as very little is sent from hence the supplies must be received from Hamburgh and other ports in the North.

I have the honour to be, &c.

John Backhouse, Esq.
&c. &c. &c.

(a) Payments from the Burmese Government, under the Treaty of 24th February 1826.

(b) In 1815-16 a Loan was obtained from the Nabob of Oude, of £1,109,975, which was commuted for Territory, by the Treaty of 1st of May 1816. The amount may be considered as a deduction from the Charges of the War against Nepal, from which State the Territory was conquered; and as increasing the Bengal Surplus Revenue to £3,051,443.

(c) Batta to Troops engaged in the Burmese War.

(d) This sum is a part of the Deccan Prize Money, which was erroneously credited as Revenue in former years.

(C.)—No. 2. D.

EXPLANATORY NOTES relative to the Distinctions of TERRITORY observed in the Account No. 2, and its Appendices.

"THE Company's Original Possessions" may be understood to comprise, generally, those provinces the revenues of which they received in the year 1790. At that date, none of the Territory, the receipts from which are shewn in the Statement, No. 2 B, had been acquired.

Those Original Possessions were,—

Under the BENGAL Presidency :

The provinces of Bengal, Bahar, Orissa, and Benares.

Under the MADRAS Presidency :

Fort St. George, with the town of Madras; the Company's jaghire in which it is situated; Nagore, Negapatam, Cuddalore, and the five Northern Circars, viz. Guntoor, Condapilly, Eillore, Rajahmundry, and Chicacole.

Under the BOMBAY Presidency :

The town and island of Bombay, the island of Salsette, Fort Victoria, and a few other forts on the coast of Malabar. The Company received also a part of the Revenues of Surat, as governors of the castle of Surat, and commanders of the Nabob's fleet. In 1800, the Revenues (except a share reserved for the Nabob) and the civil and military administration of Surat, were made over to them. The increased Receipts from that town are carried to account as appertaining to an original possession.

The districts to which the Receipts and Charges exhibited in the Statement No. 2. B, apply, are the following :—

The Ceded Districts of OUDE.

In 1809-10, the Revenues and Charges of the provinces which were ceded by the Nabob under the Treaty of the 20th of November 1801, in commutation of Subsidy, and of all other pecuniary claims of the British Government, are exhibited.—The same remark is applicable to the whole period. These districts lie on the eastern, southern, and western borders of the present kingdom of Oude, and are bounded on the south by the Jumna, from a point above Etawah to its confluence with the Ganges at Allahabad.

ARCOT.

The Receipts and Charges of 1809-10, and throughout the period, are those of the whole of the Carnatic Payen Ghaut (or below the Ghauts), comprehending, for the most part, the country lying between the coast of Coromandel and the Ghauts, and stretching from Ongole to Cape Comorin. The Revenues of these districts, together with the charge of the civil and military administration, were ceded to the Company by treaty with the Nabob of Arcot, dated the 31st of July 1801, from which State a Subsidy had previously been received.—It was stipulated in the Treaty, that one-fifth of the Net Revenue (but not exceeding a specified amount) should be paid to the Nabob, and a sum set apart annually for the liquidation of the private debts of his predecessors, which sums are included in the charges.

TANJORE.

TANJORE.

The whole of the Revenues of Tanjore were ceded to the Company in lieu of the Subsidy previously paid under the Treaty of the 25th of October 1799, the Company undertaking the administration of the country, and allowing to the Rajah, annually, one lac of pagodas, and one-fifth of the net revenues, if under a specified sum. No alteration has occurred since 1809.

MYSORE.

The Treaty of Seringapatam, of 18th March 1792, whereby Tippoo Sultaun consented to surrender half his dominions, put the Company in possession of a part of them, consisting of Calicut, and the districts of Barramahal and Dindigul, provinces of Mysore bordering on the Carnatic. The Treaty of Mysore of 22d June 1799, after the death of Tippoo, greatly increased the Company's share of his former territories, adding to it the districts of Malabar, Canara, Salem, Coimbatour, and Seringapatam. As to situation, the whole, if taken in connection with the districts in the Ballaghaut, ceded by the Nizam, comprehends nearly all the territory lying between the Malabar coast, the river Toombuddra, and the Carnatic, excepting the small states of Travancore and Cochin, and the territory reserved for the restored Rajah of Mysore. The Receipts from all the districts acquired directly from Mysore are shown under this head. By the last-mentioned Treaty, the present Rajah of Mysore agreed to pay seven lacs of pagodas for the defence of his dominions, which constitutes an addition to the Receipts.

Cessions by the NIZAM.

By the stipulations of several Treaties, the Nizam had engaged to pay a subsidy to the Company for the supply of a specified amount of force for the defence of his dominions. But by the Treaty of 12th October 1800, under which the subsidiary force was considerably augmented, the Nizam agreed, instead of the payment of Subsidy, to cede to the Company the territory formerly belonging to Tippoo, which fell to the share of the Nizam under the Treaties of Seringapatam and Mysore. This was the Ballaghaut (or country above the Ghauts), and is now divided into the collectorates of Bellary and Cuddapah. It is situated to the south of the Toombuddra and Kistna rivers, and on the east is bounded by the northern districts of the Carnatic. It remains the same as at the cession.—A sum paid to the Nizam in 1823-24, to enable that Prince to relieve himself from a considerable debt, and which was received by him in commutation of an annual payment, denominated "Peshoush," is inserted under this head, from its constituting a pecuniary transaction with that particular native government, although not connected with the districts above referred to.

Districts ceded by the GUICOWAR Rajah.

Various arrangements for the grant of districts, the Revenues of which should cover the expense of a subsidiary force stationed in the Guicowar dominions, were extended and consolidated in the Treaty of 21st April 1805, which finally assigned to the Company certain districts in Guzerat, on or near the Gulf of Cambay, and lying on its eastern, northern, and western shores. Some villages and duties belonging to the Guicowar in the districts of Surat and Broach, were also assigned to the Company, and the revenues of other pergunnas,—Baroda, Rajpeepla, &c.—were secured to them for the liquidation of debts owing by the Guicowar. On the 6th November 1817, a Treaty, called supplementary to that of 1805, was concluded, stipulating for the employment of an increased British force, to meet the expense of which the Guicowar further ceded his share of the city of Ahmedabad, and surrendered the perpetual farm of the

the Peishwa's territories subject to that city, which had been secured to him in the same year by treaty with the Peishwa. Some exchange of districts also took place. An increased Receipt is shown in the Statement, which was the result of this arrangement. The Treaties of 1805 and 1817 still continue in force.

Districts acquired by Cession and Conquest from the MAHRATTAS.

The districts of which the Receipts and Charges appear in the Statement under the head of "Mahratta," consisted in 1809-10 of the following:—

1. The cessions by the Peishwa under the Treaty of Bassein, dated 31st December 1802, modified by the Supplemental Treaty of 16th December 1803. These consisted, 1st, of the province of Bundelcund, south of the Jumna, and of the territories ceded by Oude, which province is administered by the Bengal Government; and 2dly, of certain Land Rents, Customs, and Duties in the Surat district, which are received by the Bombay Government. These cessions were made to meet the charge of a British force in the Peishwa's dominions.

2. The countries conquered from Scindia, consisting 1st, of districts in the Doab, bordering on the Oude cessions, and situated to the eastward of the Jumna; also of other districts, to the westward of that river, including the cities of Delhi and Agra; these are under the management of the Bengal Government. And 2dly, of the town of Broach and its dependencies, administered by that of Bombay; these territories were surrendered by the Treaty of 30th December 1803, together with Gwalior and Gohud. But the latter two were given back by the Treaty of 22d November 1805, which also fixed the river Chumbul, from the city of Kotah to the Gohud boundary, as the border of Scindia's dominions towards the territory acquired by the British Government. Gohud was finally ceded to the British by its Ranah in 1806, in exchange for other territory.

3. The province of Cuttack, in Orissa, lying on the Bay of Bengal, with the port and district of Balasore, conquered from the Rajah of Berar, and now subject to Bengal. This was surrendered by the Treaty of 17th December 1803. Other districts then surrendered, were given up in 1806, with the exception of the petty state of Royghur, which remains under our sovereignty.

No material alteration took place in regard to the above-mentioned territories till the year 1817, except that in 1815-16 the Accounts of the province of Cuttack were incorporated by the Bengal Government with those of the other districts in Orissa, and Cuttack is thenceforth treated as a part of the original Possessions. But, on the 13th of June 1817, a new Treaty with the Peishwa was entered into, whereby an addition to the subsidiary force was provided for, and, in return, he ceded to the Company all his remaining territories in Guzerat, with the tribute of Kattywar, the Northern Concan (a district south of Guzerat, extending to the coast), Darwar, and Koosigul, in the southern part of his dominions, and Ahmednuggur, north-east of Poonah, a fort where the subsidiary force was stationed. The occupation of most of the above districts occasioned an increased receipt in 1817-18, but the commencement of hostilities by the Peishwa occurred in November 1817, and led to a very different arrangement. The result, together with that of the rupture with Holkar, was the acquisition, by the British Government, of the whole of the Peishwa's dominions (except the territory assigned to the restored Rajah of Sattara), and all Holkar's dominions in Candeish. These, united, extend from the northern boundary of the Mysore state to the Sautpoorah Hills, north of the Taptie, and from

from the Nizam's country to the sea. That territory, together with the Northern Concan and the Guzerat districts, ceded in 1817, are under the management of the Bombay Government, and the revenues are generally considered as realized from countries acquired from the Mahrattas.

Some exchanges of small districts, deemed nearly of equal value, were afterwards effected with the Nizam in 1822.

The Revenues and Charges of the acquisitions from the Berar territories in 1818 have been separately classed by the Bengal Government, and in the Parliamentary Accounts, under the head of "Ceded Territory on the Nerbuddah, &c." and will next be noticed.

Ceded Territory on the NERBUDDAH, &c.

The districts under this head which yield the largest revenue, are, Jubbulpore, Hussingabad, Baitool, and others, forming a tract of considerable breadth and extent, south and north of the river Nerbuddah, which were conquered from the Rajah of Berar in 1817, and made over by the Treaty of the 6th of January 1818. With these the Bengal Government have usually connected:—First, districts further north of the Nerbuddah, of the Revenues of which they became possessed, after dislodging from thence the Pindarry hordes, and subduing the Mahratta Powers. Such are, Saugor, Hutta, and Bhopaul;—Secondly, the Tributes received since 1818 from several Rajpoot States, extending from the Nerbuddah to Jypore;—Thirdly, the Revenue received from Ajmere, a small district south-west of Jypore, ceded by Scindia; and that of a few districts possessed by Holkar, previously to 1818, "within, and north of the Boondie Hills," and lying south of Jypore, which he surrendered by the Treaty of 6th of January of that year. The present head, therefore, may be considered as embracing receipts from countries in Central India, resulting from the Mahratta war of 1817 and 1818, which are not classed under other heads.

Subsidy from TRAVANCORE.

The Treaty under which the Rajah of Travancore agreed to receive a British force, consisting of three battalions of Sepoys and a corps of Artillery, and to pay a subsidy in return, was executed in the year 1795. An addition to the force of a regiment of Sepoys was made in 1805, for which, and for any further increase of force that might be required, an increase of the subsidy was provided. In failure of payment, such part of the country as the Governor-General should select, was to be occupied till the object of the Treaty was fulfilled. Subsequent disturbances prevented, for a time, the realization of the subsidy, but since the restoration of a good understanding in 1808, it has generally been paid with punctuality.

Subsidy from COCHIN.

The Rajah of Cochin, under the Treaty of the 6th of May 1809, engaged to defray the expense of one battalion of Native Infantry, in addition to his "usual subsidy of one lac of rupees," in default of the payment of which he was liable to an occupation of his territory, of the same description as the Rajah of Travancore, above stated. The Receipts shown in the account are the result of that agreement.

Territories acquired by Conquest from the BURMAH State.

These consist of the provinces of Arracan, adjoining the district of Chittagong, and those of Tavoy, Mergui, and Tenasserim, on the Bay of Bengal, south of Rangoon, ceded by the
Burmese

SELECT COMMITTEE OF THE HOUSE OF LORDS. 1809

Burmese Government, under the Treaty of 24th of February 1826, under which, also, that Government surrendered all right over the province of Assam, and the smaller states of Cachar and Jyntia. Assam has since been annexed to the British territories. The Burmese Government also agreed to pay a crore of rupees towards the expense of the war, a part of which appears as a Receipt in the last two years of the Statement.

It may be observed, finally—First, that the sums appearing in these Accounts can only be considered as an approximation to accuracy, as the accounts kept in India, and especially at Bombay, do not in all cases preserve the distinction between original and recently acquired possessions; and, secondly, with respect to the “Charges” shown in the Account No. 2 B., that they do not include the expense of the general civil government of the provinces, or that of their military occupation.

† The sums in these Columns do not include the amount of the Government Securities in the hands of the Commissioners of the Sinking Fund. The operation of that Fund has now ceased.

‡ The large reduction of the Amount of "Debts Outstanding" in Bengal in 1815, as compared with 1814, was caused by the transfer in 1814-15 to "Account Current London" of various Charges for Expeditions to Egypt, the Isle of France, Bourbon, and Java, which in former years have been considered as Debts due in India.

(C.) No. 6.—An Account of the Amount of the Assets of the East-India Company, at the several Presidencies and Settlements in India, on the 30th April in each Year, from the Year 1814 to the Year 1827, both inclusive, distinguishing the Territorial from the Commercial Assets—*continued.*

Mem.—The Advances in India and China, for the provision of Commercial Investment, being made generally, as well without distinction in respect to the ultimate destination of such Investment, as without reference to the particular source from which the funds for its provision are derived, the above Account is, of necessity, in a great measure formed upon computation.

A portion of the Advances in India, for the China Investment, may be regarded as applicable to the purchase of the Teas which have been supplied by the Company to the North American Colonies, since 1824-25; but as the proceeds of these Consignments are intended for eventual realization in England, they have been considered, in framing the above Account, as falling under the descriptions of Investment for Europe.

On the other hand, Advances applied, both in India and China, to the provision of Cargoes for the Cape, are excluded, the proceeds of these Cargoes having been applied at the Cape to the supply of St. Helena, and other Territorial service.

* The Sum stated in this Account as due from Government to the East-India Company (exclusive of the Balance of the old Account) is £376,020, and comprehends the Expenditure in India to the 1st May 1814, and in England to the 1st May 1815; whereas the Expenditure, if estimated to the present time, and including Interest, may probably exceed £2,000,000.

† The Amount of the present Home Bond Debt, it is believed, has been chiefly, if not entirely, incurred on account of Payments made within the period of the last Charter, for the Territory, beyond the Amount received in England from the said Territory; but as an investigation of this matter cannot be finished within the time in which the present Account must be submitted to Parliament, the Amount of the Bond Debt is here placed against the joint heads of Territory and Commerce.

* *Mem.*—This Balance is subject to reduction by the Amount of the Advances made in India from the Territorial Branch to the Commercial Branch, in the Indian Official Year 1827-28. The Documents whereby the Amount of these Advances is to be ascertained have not as yet been received from India, but which it is estimated may amount to £3,124,900, which will leave a balance due to the Commerce of £5,017,203 including Interest.

In the period from 1st May 1814, to 1st May 1828, there has also been advanced, or set apart from the surplus Commercial Profits in England, the sum of £4840,955 towards the liquidation of Indian Territorial Debt; which being a payment under the fourth head of Appropriation of the 57th section of the 53d Geo. 3, is not held to constitute a claim upon the Territorial Department for repayment, upon the principle observed in respect to other Territorial Advances.

their Capital Stock), drawn out, in respect to England, to the 1st of May 1828, and in 1st May 1827—continued.

The Home Bond Debt is stated without specific application to either branch of the Company's affairs, it not being determined to what extent the debt had its origin from political causes.

In the above Account, the article of Dead Stock is valued at £400,000, which includes buildings and fortifications, plate, household furniture, plantations, farms, sloops, vessels, stores, and other articles of dead stock, according to Lord Godolphin's award in the year 1702; whereas the whole of the sums of money expended in buildings and fortifications, by the latest advices from the Company's several Settlements, for the acquisition and maintenance of their Possessions, and the nearest estimated value of other articles of dead stock, is as follows:

at the Foreign Office, February 18, 1829; with One Enclosure.

SIR,

WITH reference to the request made by Lord Ellenborough, to be furnished with a Statement of the Quantity of Tea imported into Holland by the Americans, in each Year since 1813, I am directed by the Earl of Aberdeen to send to you for his Lordship's information, the Duplicate of the Report upon this subject, which has been received from His Majesty's Consul at Rotterdam.

The Report from Washington will be forwarded as soon as it is received.

I am, &c.

The Secretary to the Board of Controul.

Copy of a LETTER from *Alexander Ferrier*, Esq., His Majesty's Consul at Rotterdam, to
John Bidwell, Esq. dated 7th October 1828.

SIR,

IN obedience to the desire of the Earl of Aberdeen, communicated by your Letter of the 2d instant, I have now the honour to acquaint you, for the information of his Lordship, that the importation of Tea into this Kingdom, since the Year 1818, has been as follows:—

		By Citizens of the United States.	By Netherlands Vessels. or for Dutch Account.
In 1818	..	53,154 Qr. Chests.	37,381 Qr. Chests.

SELECT COMMITTEE OF THE HOUSE OF LORDS. 1481

The whole Import in these ten Years having been 419,318 Quarter Chests; and the consumption is estimated at about 40,000 Quarter Chests per Annum.

In 1827, the Netherlands Trading Company began to import, and are now the only Dutch importers, having four vessels employed in that trade.

No information of the foregoing nature can be obtained in this country from Official Sources, and as yet, my endeavours to procure satisfactory particulars of the Imports from 1813 to 1817 have proved ineffectual: but I shall continue my inquiries, and if successful, shall have the honour of again addressing you upon this subject.

John Bidwell, Esq.

Superintendent of the Consular Service,
Foreign Office.

I am, &c.

(Signed)

ALEXANDER FERRIER.

P. S.—Up to this date there have been imported in the current Year, 28,404 Quarter Chests by Netherland vessels, and 18,108 by Citizens of the United States.

(Signed)

ALEXANDER FERRIER.

APPENDIX D.

GLOSSARY

OF

O R I E N T A L T E R M S.

Originally annexed to the FIFTH REPORT of the Committee of the House of Commons on the Affairs of the East-India Company in 1812-13, and communicated to the House of Lords in 1830.

PREFACE EXPLANATORY.

THE numerous Oriental Terms occurring in the Fifth Report and its Appendix, have been adopted from most of the languages current throughout INDIA :—from *Arabic, Persian, Sanskrit, Hindustany, Bengaly, Telinga, Tamul, Canara, and Malabar*; and a few from *Turkish and Malay*. In spelling them, little attention has been paid to correctness or consistency. This has arisen, in some degree, from there being no fixed rules for the notation of Oriental terms in the letters of our imperfect alphabet, every one spelling according to his ear; but in a greater degree, from the ignorance or inattention of the Native Clerks, employed in the public offices in India to copy the transactions of the East-India Company. To give an instance of the confusion occasioned from these circumstances, the word which, according to its form and sound in *Arabic*, should be written *Mahāl* (مَحَال), the first vowel short, and the last long, occurs under no less than eight different shapes, not one of which is correct upon any system of orthography, viz. *Mal, Maal, Mahl, Mehal, Mchual, Mchaul, Mhal, and Mohaul*. A great many other instances occur where the same term is variously spelt, and often in the same page.

In collecting and arranging the words herein to be explained, it hence became necessary that they should be exhibited under their various spellings, however incorrect, just as they appear in the *printed* Report and Appendix; but in order to remedy the evil above complained of, an attempt has been made to trace each word to its source, to exhibit it in its genuine character, as far as Types could be procured for that purpose, and to convey its true pronunciation in the *Italic* character, upon a plan of notation differing but little from that laid down by Sir WILLIAM JONES in the beginning of the first volume of the *Asiatic Transactions*, and which has been successfully followed by others in the subsequent volumes of that work. This plan, which has at least uniformity to recommend it, consists chiefly in avoiding the use of the double vowels *ee* and *oo*, by substituting for them *i* and *u* with the *Italian* pronunciation, and in distinguishing the long vowels from the short by the use of the accent. Thus *a, e, i, o, u*, are to be pronounced short, and *ā, ē, ī, ō, ū*, long, and both as by the *Italians*.

Many words in this Glossary could not be traced to their origin; and a few occur in the Report and Appendix, which will not be found in the Glossary, because, neither their etymology, nor their technical application, could be satisfactorily explained. It has also been part of the plan to give the *radical* and *common* acceptation of every term, as well as the *official* and *technical* application of it; whenever this, or any other part of the scheme has failed, it is attributable to the want of knowledge, and time for further research, to supply that deficiency.

ABWAB.

(A. ابواب *abwāb*, plur. of باب *bāb*, a gate, door, way).—Items of taxation, cesses, imposts, taxes. This term is particularly used to distinguish the taxes imposed subsequently to the establishment of the *assul*, or original standard rent, in the nature of additions thereto. In many places they had been consolidated with the *assul*, and a new standard assumed as the basis of succeeding imposition.
